National Agricultural Statistics Service

Title: Census of Agriculture Content Test.

OMB Control Number: 0535-0243.

Summary of Collection: The purpose of the content test is to evaluate factors impacting the National Agricultural Statistics Service (NASS) Census of Agriculture program. The factors include, but are not limited to, respondent burden, questionnaire format and design, new items, changes in question wording and location, ease of completion, and processing methodology such as edit and summary. The proposed forms and letters will be used in a 2005 test in preparation for taking the 2007 Census of Agriculture. NASS is responsible for conducting the Census of Agriculture under the authority of the Census of Agriculture Act of 1997, Public Law 105-113 (U.S.C. 2204g).

Need and Use of the Information: The Census of Agriculture Content Test is critical to NASS' ability to design a successful census survey. The actual Census of Agriculture is required by law every five years and serves as the basis for many agriculturally-based decisions. Less frequent content test collections would hinder NASS' ability to adequately evaluate changes needed to improve census data collection and therefore recognize changing trends in agriculture.

Description of Respondents: Farms.

Number of Respondents: 30,450.

Frequency of Responses: Reporting: Other (every 5 years).

Total Burden Hours: 14,496.
