DEPARTMENT OF THE INTERIOR

Roosevelt Habitat Conservation Plan (RHCP) for Gila and Maricopa Counties, Arizona

AGENCY: U.S. Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS) and notice of public scoping meeting related to the Roosevelt Habitat Conservation Plan (RHCP).

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA), this notice advises the public that the U.S. Fish and Wildlife Service (Service) intends to prepare an EIS to evaluate the impacts of and alternatives for the possible issuance of an incidental take permit (ITP), pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (Act), to the Salt River Project (SRP). SRP proposes to be an applicant for an ITP, through development and implementation of the RHCP, as required by the Act for

issuance of an ITP. The RHCP will provide the measures to minimize and mitigate the effects of the proposed taking of listed and sensitive species and the habitats upon which they depend.

DATES AND ADDRESSES: Written comments on alternatives and issues to be addressed in the EIS are requested by November 22, 2001, and should be sent to Mr. David Harlow, Field Supervisor, U.S. Fish and Wildlife Service, 2321 West Royal Palm Road, Suite 103, Phoenix, AZ 85021 at 602/242-0210. Oral and written comments also will be accepted at a public scoping meeting to be held on October 22, 2001, 6-8 p.m. at the offices of the Salt River Project, 1521 Project Drive, Tempe, Arizona.

Written comments received by the Service become part of the public record associated with this action. Those comments, as well as the names and addresses of anyone who provides comments may and can be disclosed to requesters of information associated with this notice under the Freedom of Information Act.

FOR FURTHER INFORMATION ON THE EIS,

CONTACT: On the EIS, Contact: Ms. Sherry Barrett, Assistant Field Supervisor, Tucson Suboffice, U.S. Fish and Wildlife Service, 300 West Congress, Room 6J, Tucson, AZ 85701 at 520/670-4617, or Mr. Jim Rorabaugh, Arizona State Office, U.S. Fish and Wildlife Service, 2321 West Royal Palm Road, Suite 103, Phoenix, AZ 85021 at 602/242-0210.

For further information on the RHCP, Contact: Mr. John Keane, Executive Environmental Policy Analyst, Salt River Project, P.O. Box 52025, PAB355, Phoenix, AZ 85072-2025 at 602/236-5087, or Mr. Steve Dougherty, Senior Ecologist, ERO Resources Corporation, 1842 Clarkson Street, Denver, CO 80218 at 303/830-1188.

SUPPLEMENTARY INFORMATION: This notice advises the public that the Service intends to gather information necessary to determine impacts and formulate alternatives for the EIS related to the potential issuance of an ITP to SRP and the development and implementation of the RHCP, which will provide measures to minimize and mitigate the effects of the incidental take of federally listed species.

Background

Roosevelt Dam and reservoir (Roosevelt) is operated by SRP in conjunction with three other reservoirs on the Salt River and two reservoirs on the Verde River as integral features of the Salt River Reclamation Project (Project), authorized by the Reclamation

Act of 1902, and pursuant to a 1917 contract with the United States. Since completion in 1911, Roosevelt has provided water for power generation, irrigation, municipal and other uses. Currently, the reservoir system supplies water to more than 1.6 million people in the cities of Phoenix, Mesa, Chandler, Tempe, Glendale, Gilbert, Scottsdale, Tolleson, and Avondale. In addition, water is provided to irrigate agricultural lands within the Project and for other uses. Also, water is delivered to the Salt River Pima-Maricopa Indian Community, Fort McDowell Indian Community, Gila River Indian Community, Buckeye Irrigation Company, Roosevelt Irrigation District, Roosevelt Water Conservation District, and others. Roosevelt and the other SRP reservoirs also provide a variety of recreational uses and environmental benefits in central Arizona.

Due to dry conditions in central Arizona for the past several years, the reservoir level behind Roosevelt Dam has been below normal. As a result, riparian vegetation has invaded and flourished in the portion of the storage space historically used by SRP to store water for use in the Phoenix metropolitan area. Animals that use riparian habitat have followed the vegetation growth and now occupy areas within the reservoir. In particular, a population of southwestern willow flycatchers (*Empidonax traillii extimus*), which is listed as endangered under federal law, now occupies habitat within the storage space at Roosevelt. Thus, periodic refilling of the reservoir may adversely affect habitat used by the southwestern willow flycatcher and other sensitive species.

Purpose and Need for Action

Section 9 of the Act prohibits the "taking" of threatened and endangered species. The Service may, however, under limited circumstances, issue permits to take federally listed and candidate species, when such a taking is incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22. The term "take" under the Act means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct. The proposed permit would allow approved incidental take associated with SRP's filling of the reservoir space and continued operation of Roosevelt, consistent with its purpose as a water storage and power generation facility.

Section 10(a)(1)(B) of the Act and regulations at 50 CFR 17.32 contain provisions for issuing ITPs to non-
