

cases best technology available (BTA) requirements for facilities that discharge small amounts of non-contact cooling water in Massachusetts and New Hampshire.

Non-contact cooling water is water used for cooling that does not come into contact with any raw material, intermediate product, waste product, or finished product; the only anticipated pollutant is heat. Discharges composed of anything other than non-contact cooling water will not be granted coverage under this general permit. Those dischargers must seek coverage under an individual permit or an appropriate general permit.

The permit includes effluent limitations based on best professional judgment (BPJ) and water quality considerations. The effluent limits established in the permit assure that the surface water quality standards of the receiving water are maintained and/or attained. The permit also contains BTA requirements for cooling water intake structures for facilities that withdraw less than 1 million gallons per day of surface water for non-contact cooling in order to ensure source water protection. For facilities that use groundwater or municipal drinking water for non-contact cooling, the permit establishes effluent limitations and/or additional monitoring for expected constituents (metals and residual chlorine, respectively).

Other Legal Requirements

Endangered Species Act (ESA)

EPA has updated the provisions and necessary actions and documentation related to potential impacts to endangered species from facilities seeking coverage under the NCCW GP. EPA has requested concurrence from the appropriate federal services (U.S. Fish and Wildlife Service and National Marine Fisheries Service) regarding the requirements of this general permit.

National Historic Preservation Act (NHPA)

In accordance with NHPA, EPA has established provisions and documentation requirements for facilities seeking coverage under the NCCW GP to ensure that discharges or actions taken under this permit will not adversely affect historic properties and places.

Authority: This action is being taken under the Clean Water Act, 33 U.S.C. 1251 *et seq.*

Dated: September 24, 2014.

Proposed Agenda

The Office of Strategic Planning & Policy Analysis of the Federal Communications Commission (FCC) provides panelist names and other information about an event in the Open Internet roundtable series: “Economics of Broadband: Market Successes and Market Failures,” which will take place on October 2, 2014. This roundtable was previously announced in a Notice. At that time, it was unclear whether the roundtable would be a “meeting” of the Commission. As such, that Notice was not published in the **Federal Register**. This Notice shall serve as notice that a quorum of Commissioners may be present at the roundtable, in compliance with part 0, Subpart F of the Commission’s rules. This Notice does not, however, change the “permit-but-disclose” status of the *Open Internet* proceeding under the Commission’s *ex parte* rules.
