

individuals for review and comment in September 15, 2002. Public meetings were held as needed to keep all interested parties informed of the study progress and to obtain public input to the plan and environmental evaluation.

Agency consultation and public participation to date have shown no unresolved conflicts with the implementation of the selected plan.

Conclusion

The Environmental Assessment summarized above indicates that this federal action will not cause significant local, regional, or national impacts on the environment. Therefore, based on the above findings, I have determined that an environmental impact statement for the Mill Creek Watershed Plan Supplement is not required.

Title: 7 CFR part 1728, Electric Standards and Specifications for Materials and Construction.

Type of Request: New collection.

Abstract: The Rural Utilities Service makes loans and loan guarantees in accordance with the Rural Electrification Act of 1936, 7 U.S.C. 901 *et seq.* (RE Act). Section 4 of the RE Act requires that RUS make or guarantee a loan only if there is reasonable assurance that the loan, together with all outstanding loans and obligations of the borrower, will be repaid in full within the time agreed. In order to facilitate the programmatic interests of the RE Act, and, in order to assure that loans made or guaranteed by RUS are adequately secure, RUS, as a secured lender, has established certain standards and specifications for materials, equipment, and the construction of electric systems. The use of standards and specifications for materials, equipment and construction units helps assure RUS that: (1) Appropriate standards and specifications are maintained; (2) RUS loan security is not adversely affected; and (3) loan and loan guaranter funds are used effectively and for the intended purposes. 7 CFR 1728 establishes Agency policy that materials and equipment purchased by RUS electric borrowers or accepted as contractor-

furnished material must conform to RUS standards and specifications where they have been established and, if included in RUS IP 202-1, "List of Materials Acceptable for Use on Systems of RUS Electrification Borrowers" (List of Materials), must be selected from that list or must have received technical acceptance from RUS.

Estimate of Burden: This collection of information is estimated to average 20 hours per response.

Respondents: Businesses or other for profits.

Estimated Number of Respondents: 38.

Estimated Number of Responses per Respondent: 2.30.

Estimated Total Annual Burden on Respondents: 1,760 hours.

Copies of this information can be obtained from Michele Brooks, Program Development and Regulatory Analysis, at (202) 690-1078. FAX: (202) 720-4120.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: December 18, 2002.

Acting Administrator, Rural Utilities Service.
