[Project No. 15240–000]

PacifiCorp; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On October 13, 2021, PacifiCorp filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Dry Canyon Pumped Storage Project (Dry Canyon Project or project) to be located on Mud Lake, near Saint Charles, Bear Lake County, Idaho. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A roller-compacted concrete dam with a height of 530 feet and a crest length of 2,900 feet; (2) a rock-armored earthen levee with an average height of 22 feet above the bottom of the Mud Lake and a length of 24,242 feet with two inlet/outlet structures; (3) an upper reservoir with a surface area of 182 acres and a storage volume of approximately 26,880 acre-feet; (4) three 22-foot-diameter, 6,650-foot-long concrete and steel penstocks; (5) a 660-foot-long and 110-foot-wide underground generating/pumping station chamber with six 300-megawatt generating/pumping units; (6) three 22-foot-diameter, 2,200-foot-long concrete-lined tailrace tunnels; (7) a lower reservoir with a surface area of 1,390 acres and a storage volume of 30,680 acre-feet; (8) a 500 kilovolt transmission line from the powerhouse to a new substation that would interconnect to PacifiCorp's existing or planned transmission lines; and, (9) appurtenant facilities. The estimated annual generation of the Dry Canyon Project would be 5.4 terawatt-hours.

Applicant Contact: Mark Stenberg, License Program Manager, PacifiCorp, 822 Grace Power Plant Rd., Grace, ID 83241; email: mark.stenberg@pacificorp.com; phone: (208) 339–9552.

Abstract: The NO_x SIP Call was created to reduce emissions of nitrogen oxides (NO_x) from power plants and other large combustion sources. NO_x is a prime ingredient in the formation of ground-level ozone (smog), a pervasive air pollution problem in many areas of the eastern United States. The NO_x SIP Call requires affected states to include certain provisions in their state implementation plans (SIPs) addressing emissions of NO_x that adversely affect air quality in other states. Although most large combustion sources affected under the NO_x SIP Call are also subject to monitoring requirements under the Acid Rain Program or the Cross-State Air Pollution Rule, this information collection is being renewed because some industrial sources in certain states are still required to monitor and report

emissions data to EPA under these rules, so we will account for their burden. All data received by EPA will be treated as public information. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Form Numbers: None.

Respondents/affected entities: Entities which participate in the NO_x SIP Call.

Respondent's obligation to respond: mandatory (Sections 110(a) and 301(a) of the Clean Air Act).

Estimated number of respondents: EPA estimates that there are 356 units that will continue to conduct monitoring solely under the NO_x SIP Call.

Frequency of response: yearly, quarterly, occasionally.

Total estimated burden: 140,226 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$20,622,606 (per year), includes \$9,194,261 annualized capital or operation & maintenance costs.

Changes in the estimates: There is increase of 8,281 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to assumptions made in the previous ICR regarding the number of respondents. In the previous ICR, EPA estimated fewer sources would continue to follow the Part 75 monitoring requirements due to amendments to the NO_x SIP Call. This ICR is based on updated information regarding the actual numbers of sources.

Director, Regulatory Support Division.
