*Type of Review:* A new information collection.

*Respondents/Affected Public:* State, Local, and Tribal Governments.

It will also examine whether non-cognitive and school environment factors contribute to the prediction of successful 9th grade transitions after academic factors have been taken into account. The study will use data that will be collected via a survey that was created with assistance from members of the New Mexico Achievement Gap Alliance. The survey data will be used in combination with extant student-level academic and demographic data that will be obtained from the New Mexico Public Education Department. This study will also

include comparisons between Hispanic, Native American and white students.
