SUPPLEMENTARY INFORMATION:

Title: Release of Transaction Level Report Data and Allocation Tracking System Data Provided by New Markets Tax Credit (NMTC) Program Allocatees.

Abstract: The Fund's mission is to expand the capacity of financial institutions to provide credit, capital and financial services to underserved populations and communities in the United States. The Fund's strategic goal is to improve the economic conditions

of underserved communities by providing capital and technical assistance to Community Development Financial Institutions (CDFIs), capital to insured depository institutions, and tax credit allocations to Community Development Entities (CDEs), which provide credit, capital, financial services, and development services to these markets. The Fund certifies entities as CDFIs and/or CDEs.

In June 2004, the Fund launched a new web-based data collection system called the Community Investment Impact System (CIIS). Certified CDFIs, CDFIs that have received monetary awards from the Fund through its other programs, and CDEs that have received NMTC allocations use CIIS to report their annual performance and compliance information to the Fund. The data include institution level information on CDFIs and CDEs including financial condition, staffing, ownership, markets served, loan and investment portfolios, loan sales and purchases, financial services provided, technical assistance and training provided, and community development impacts. For CDEs and a portion of reporting CDFIs, the CIIS data also include detailed transaction level data on each loan or investment in the institutions' portfolios. This transaction level data includes borrower characteristics, loan terms and repayment status, and community development outcomes associated with the transaction, such as jobs created, housing units developed, and square feet of real estate developed. The CIIS database is the only source of standardized transaction level data on CDFI and CDE loans and investments.

The Fund has a second reporting system, called the Allocation Tracking System (ATS), that CDEs that have received NMTC allocations (allocatees) use to report on their Qualified Equity Investments (QEIs). Through the ATS, an allocatee reports to the Fund timely information regarding the issuance of QEIs by the allocatee or any of the subsidiary CDEs to which the allocatee transfers its NMTC allocation (i.e., subsidiary allocatees). ATS data include the amount and date of each QEI as well as various investor characteristics, including investor type.

The Fund intends to make the Transaction Level Report data and the ATS data available to the public within the parameters of all applicable Federal information protection, privacy and confidentiality laws. The Fund expects that said data could be used by CDFIs, CDEs, funders, investors, researchers and others to gain a better understanding of the community
