**SUPPLEMENTARY INFORMATION:** Section 108(a) of the CAA directs the Administrator to identify certain pollutants which "may reasonably be anticipated to endanger public health and welfare" and to issue air quality criteria for them. These air quality criteria are to "accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air \* \* \*." Under section 109 of the CAA, EPA is then to establish NAAQS for each pollutant for which EPA has issued criteria. Section 109(d) of the CAA subsequently requires periodic review and, if appropriate, revision of existing air quality criteria to reflect advances in scientific knowledge on the effects of the pollutant on public health and welfare. Also, EPA is to revise the NAAQS, if appropriate, based on the revised criteria.

Ozone is one of six "criteria" pollutants for which EPA has established air quality criteria and NAAQS. Presently, EPA is reviewing the criteria and NAAQS for ozone. This review includes preparation of two key documents, the Air Quality Criteria for Ozone and Related Photochemical Oxidants ("Criteria Document") and a related "Staff Paper." The EPA completed its second external review draft Criteria Document for Ozone and Related Photochemical Oxidants in August 2005 (70 FR 51810, August 31, 2005).

The purpose of the draft Staff Paper is to evaluate the policy implications of the key scientific and technical information contained in the second external review draft Air Quality Criteria Document and identify critical elements that EPA staff believe should be considered in reviewing the NAAQS. The Staff Paper is intended to "bridge the gap" between the scientific review contained in the Air Quality Criteria Document and the public health and welfare policy judgments required of the Administrator in reviewing the NAAQS.

In January 2005, a first external review draft of the Air Quality Criteria

Document was released by EPA for public review and comment and for review by the Clean Air Scientific Advisory Committee (CASAC) of EPA's Science Advisory Board (70 FR 4850, January 31, 2005) at a public meeting held in May 2005. Comments received from review of the first draft document have been considered in preparing the second draft Air Quality Criteria Document. Based on the information contained in the Air Quality Criteria Document, the draft Staff Paper includes assessments and analyses related to: (1) Air quality characterization; (2) integration and evaluation of health information; (3) exposure analysis; (4) health risk assessment; and (5) evaluation of information on vegetation damage and other welfare effects. The draft Staff Paper contains no staff conclusions and recommendations with respect to possible revisions to the current standards but recommends alternative standards for purposes of conducting exposure and risk analyses. A second draft of the Staff Paper will include staff conclusions and recommendations on potential revision or retention of the primary (health-based) and secondary (welfare-based) ozone NAAQS.

The draft Exposure Analysis and Risk Assessment technical support documents describe and present the results from an ozone exposure analysis and health risk assessment in several urban areas. A draft plan, *Ozone Health Assessment Plan: Scope and Methods for Exposure Analysis and Risk Assessment*, was previously reviewed by CASAC and the public. Comments received on that plan have been considered in developing the draft Exposure Analysis and Risk Assessment technical support documents being released at this time. The Exposure Analysis and Risk Assessment methodologies and results are also discussed in the draft Staff Paper.

The EPA is soliciting early advice and recommendations from the CASAC by means of a consultation on the first draft Staff Paper, first draft Exposure Analysis, and first draft Risk Assessment at an upcoming public meeting of the CASAC. A **Federal Register** notice will inform the public of the date and location of that meeting. Following the CASAC meeting, EPA will consider comments received from CASAC and the public in preparing a second draft of the Staff Paper and the Exposure Analysis and Risk Assessment technical support documents.

Dated: November 10, 2005.
