Nature and Extent of Confidentiality: In accordance with 47CFR 4.2 of the Commission's rules, reports under Part 4 are presumed confidential.

Needs and Uses: The Commission will submit this expiring information collection (IC) to the OMB during this comment period. The Commission is seeking OMB approval for an extension (there are no changes to the reporting requirement). The Commission is reporting a significant increase of 10,100 total annual burden hours. This is due to a recalculation of our burden estimates and fewer respondents reporting information. The estimated number of respondents fluctuates because of the type of event to be reported and the location where it occurred.

In recognition of the critical need for rapid, full, and accurate information on service disruptions that could affect homeland security, public health and safety, as well as the economic well-being of our Nation, and in view of the increasing importance of non-wireline communications in the Nation's communications networks, and critical infrastructure, the Commission adopted rules requiring mandatory service disruptions reporting from all communications providers (cable,

satellite, wireline and wireless) that provide voice and/or paging communications. As envisioned, the information collected pursuant to these rules has helped improve network reliability.

OMB Control Number: 3060–1139.

December 21, 2010.

SUMMARY: As part of its continuing effort to reduce paperwork burden and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission invites the general public and other Federal agencies to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's

burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and (e) ways to further reduce the information collection burden for small business concerns with fewer than 25 employees.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid OMB control number.

The Commission adopted and released a *Report and Order*, IB Docket No. 05-216, FCC 10-7, which eliminated Part 23 rules because there were no International Fixed Public Radiocommunications Services (IFPRS) licenses in operation.

The information collected is used to facilitate coordination between the Observatory and Commission-licensed services in the Commonwealth of Puerto Rico. Applicants for new or modified radio communication facilities within the Coordination Zone are required to submit technical information concerning the applicant's proposed services to enable the Observatory to determine the potential for interference with its operations. The Observatory will perform interference evaluations at no cost to the applicants. If potential interference problems are identified, applicants are required to make reasonable attempts to resolve or mitigate such problems in order to protect the Observatory.
