

agreements, written or oral, express or implied between the parties concerning the subject matter of the investigation.” 19 CFR 210.21(b)(1).

Consistent with Commission Rule 210.21(b)(1), redacted versions of a patent license agreement and a settlement agreement between Rovi and Comcast were attached to the motion as Exhibits 1 and 2 and the unredacted agreements were filed separately under a confidential header. The moving parties submit that the agreements resolve the allegations of infringement against Comcast in the investigation. Motion at 1. In further compliance with Commission Rule 210.21(b)(1), the motion contains a statement that there are no other agreements, written or oral, express or implied between the parties concerning the subject matter of the investigation. *Id.* at 2. The movants submit that termination is in the interest of the public and administrative economy. *Id.* at 3.

Pursuant to Commission Rule 210.50(b)(2), the Commission finds no evidence that terminating this investigation will adversely affect the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, or U.S. customers. 19 CFR 210.50(b)(2). Moreover, the public interest generally favors settlement to avoid needless litigation and to conserve public resources. *See, e.g., Certain Semiconductor Devices, Products Containing the Same, and Components Thereof (II)*, Inv. No. 337-TA-1177, Order No. 5 at 2 (Nov. 25,

2019), *unreviewed by Comm’n Notice* (Dec. 20, 2019).

Accordingly, the Commission finds that the joint motion for termination satisfies Commission Rules 210.21(a)(2) and (b)(1) (19 CFR 210.21(a)(2), (b)(1)) and that termination of the investigation is not contrary to the public interest.

Accordingly, the Commission grants the joint motion to terminate the investigation in its entirety based on settlement. The investigation is terminated.

The Commission vote for this determination took place on November 30, 2020.

The authority for the Commission’s determination is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in part 210 of the Commission’s Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.

Issued: November 30, 2020.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0148]

Proposed Extension of Information Collection; Proximity Detection Systems for Continuous Mining Machines in Underground Coal Mines

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Proximity Detection Systems for Continuous Mining Machines in Underground Coal Mines.

DATES: All comments must be received on or before February 2, 2021.

ADDRESSES: You may submit comment as follows. Please note that late, untimely filed comments will not be considered.

Electronic Submissions: Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for docket number MSHA–2020–0035. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket, with no changes. Because your comment will be made public, you are responsible for ensuring that your comment does not include any confidential information that you or a

third party may not wish to be posted, such as your or anyone else's Social Security number or confidential business information.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission.

Written/Paper Submissions: Submit written/paper submissions in the following way:

- *Mail/Hand Delivery:* Mail or visit DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.

- MSHA will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at <https://www.regulations.gov>.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duties in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise, as may be appropriate, mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Under section 75.1732 of title 30 Code of Federal Regulations, MSHA requires underground coal mine operators to equip continuous mining machines, except full-face continuous mining machines, with proximity detection systems. Miners working near continuous mining machines face pinning, crushing, and striking hazards that result in accidents involving life-threatening injuries and death. Proximity detection is a technology that uses electronic sensors to detect the motion or the location of one object relative to another. Proximity detection systems provide a warning and stop continuous mining machines before a pinning, crushing, or striking accident occurs that could result in injury or death to a miner.

Section 75.1732(d)(1) requires at the completion of the check of the machine-mounted components of the proximity
