National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 970930235-7235-01; I.D. 021400A]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Closure

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS closes the commercial run-around gillnet fishery for king mackerel in the exclusive economic zone (EEZ) in the Florida west coast subzone. This closure is necessary to protect the overfished Gulf group king mackerel resource.

DATES: Effective 12:00 noon, local time, February 15, 2000, through June 30, 2000.

FOR FURTHER INFORMATION CONTACT:

Mark Godcharles, telephone: 727-570-5305, fax: 727-570-5583, e-mail: Mark.Godcharles@noaa.gov.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, cero, cobia, little tunny, dolphin, and, in the Gulf of Mexico only, bluefish) is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

Based on the Councils' recommended total allowable catch and the allocation ratios in the FMP, on February 19, 1998 (63 FR 8353), NMFS implemented a commercial quota for the Gulf of Mexico migratory group of king mackerel in the Florida west coast subzone of 1.17 million lb (0.53 million kg). That quota was further divided into two equal quotas of 585,000 lb (265,352 kg) for vessels in each of two groups by gear types—vessels fishing with run-around gillnets and those using hook-and-line gear (50 CFR 622.42(c)(1)(i)(A)(2)).

Under 50 CFR 622.43(a), NMFS is required to close any segment of the

king mackerel commercial fishery when its quota has been reached or is projected to be reached, by filing a notification at the Office of the Federal Register. NMFS has determined that the commercial quota of 585,000 lb (265,352 kg) for Gulf group king mackerel for vessels using run-around gillnets in the Florida west coast subzone was reached on February 14, 2000. Accordingly, the commercial fishery for king mackerel for such vessels in the Florida west coast subzone is closed effective 12:00 noon, local time, February 15, 2000, through June 30, 2000, the end of the fishing year.

The Florida west coast subzone extends from 87°31'06" W. long. (due south of the Alabama/Florida boundary) to: (1) 25°20.4' N. lat. (due east of the Miami-Dade/Monroe County, FL, boundary) through March 31, 2000; and (2) 25°48' N. lat. (due west of the Monroe/Collier County, FL, boundary) from April 1, 2000, through October 31, 2000.

Classification

This action responds to the best available information recently obtained from the fishery. The closure must be implemented immediately to prevent an overrun of the commercial quota (50 CFR 622.42(c)(1)) of Gulf group king mackerel, given the capacity of the fishing fleet to harvest the quota quickly. Overruns could potentially lead to further overfishing and unnecessary delays in rebuilding this overfished resource. Any delay in implementing this action would be impractical and contrary to the Magnuson-Stevens Act, the FMP, and the public interest. NMFS finds for good cause that the implementation of this action cannot be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is waived.

This action is taken under 50 CFR 622.43(a)(3) and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 14, 2000.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

50 CFR Part 679

[Docket No. 000119015-0015-01; I.D. 021100A]

Fisheries of the Exclusive Economic Zone Off Alaska; Pollock by Vessels Not Participating in Cooperatives that are Catching Pollock for Processing by the Inshore Component in the Bering Sea Subarea of the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is prohibiting directed fishing for pollock by vessels not participating in cooperatives that are catching pollock for processing by the inshore component in the Bering Sea subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary because the interim A/B season allocation of pollock total allowable catch (TAC) specified for vessels not participating in cooperatives that are catching pollock for processing by the inshore component in the Bering Sea subarea of the BSAI will be reached.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), February 11, 2000, until 1200 hrs, A.l.t., June 10, 2000.

FOR FURTHER INFORMATION CONTACT:

Mary Furuness, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

In accordance with § 679.20(a)(5)(i)(D)(3) and the revised interim 2000 TAC amounts for pollock in the Bering Sea subarea (65 FR 4520, January 28, 2000), the A/B season allocation of pollock TAC specified to the vessels not participating in cooperatives catching pollock for processing by the inshore component in the Bering Sea subarea is 11,968 metric tons (mt).

In accordance with § 679.20(d)(1)(i), the Administrator, Alaska Region,

NMFS (Regional Administrator), has determined that the A/B season allocation of pollock TAC specified to the vessels not participating in cooperatives that are catching pollock for processing by the inshore component in the Bering Sea subarea will be reached. Therefore, the Regional Administrator is establishing the A/B season allocation of pollock TAC as the directed fishing allowance (§ 679.20(a)(5)(i)(D)(2)). In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance soon will be reached. Consequently, NMFS is prohibiting directed fishing for pollock by vessels not participating in cooperatives that are

catching pollock for processing by the inshore component in the Bering Sea subarea.

Maximum retainable bycatch amounts may be found in the regulations at § 679.20(e) and (f).

Classification

This action responds to the best available information recently obtained from the fishery. It must be implemented immediately in order to prevent exceeding the A/B season allocation of pollock TAC specified to the vessels not participating in cooperatives catching pollock for processing by the inshore component in the Bering Sea subarea. A delay in the effective date is impracticable and

contrary to the public interest. Further delay would only result in overharvest. NMFS finds for good cause that the implementation of this action can not be delayed for 30 days. Accordingly, under 5 U.S.C. 553(d), a delay in the effective date is hereby waived.

This action is required by § 679.22 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*
