Background

The Associate Administrator for Commercial Space Transportation of the Federal Aviation Administration (FAA), Department of Transportation (DOT), published a notice proposing to amend the FAA's commercial space transportation regulations (October 25, 2000, 65 FR 63921). The FAA proposes to amend its regulations to codify its license application process for launch from a non-federal launch site. A non-federal launch site is a launch site not located on a federal launch range. The proposed regulations are also intended to codify the safety requirements for launch operators regarding license requirements, criteria, and responsibilities in order to protect the public from the hazards of launch for launch from a federal launch range or a non-federal launch site.

Extension of Comment Period

In accordance with § 404.13 of Title 14, Code of Federal Regulations, the FAA has reviewed the petitions made by International Launch Services, Lockheed Martin Corporation, Orbital Sciences Corporation, Sea Launch Company, LLC and The Boeing Company for extension of the comment period to Notice No. 00-10. These petitioners jointly requested an extension of time of 180 days to permit more time to address substantial issues in the notice of proposed rulemaking. To allow additional time for a more thorough review of applicable issues and drafting of responsive comments, the FAA finds that there is good cause and it is in the public interest to extend the comment period for an additional 60 days beyond the 120 already provided. Accordingly, the comment period for Notice No. 00-10 is extended until April 23, 2001.

Issued in Washington, DC, on February 15, 2001.

Patricia Grace Smith,

Associate Administrator for Commercial Space Transportation.
