AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of proposed amendments to contract terms and conditions.

SUMMARY: The Minneapolis Grain Exchange (MGE or Exchange) has proposed amendments to the Exchange's durum wheat futures contract. The proposed amendments would revise the futures contract's quality specifications. The proposed amendments were submitted under the Commission's 45-day Fast Track procedures which provides that, absent any contrary action by the Commission, the proposed amendments may be deemed approved on February 24, 2000—45 days after the Commission's receipt of the proposals. The Acting

Director of the Division of Economic Analysis (Division) of the Commission, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposed amendments is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, Three Lafayette Centre, 21st Street, NW Washington, DC 20581. SUPPLEMENTARY INFORMATION: The futures contract currently calls for the delivery of durum wheat meeting specified quality requirements. These existing requirements, with one exception, meet or exceed the standards for U.S. grade No. 2 hard amber durum wheat. In addition, the contract sets forth standards for protein content, falling number, moisture content, dockage, and hard vitreous amber kernels which are not specified in the official U.S. standards for grain. The proposed amendments would make the contract's standards conform to the requirements for U.S. No. 2 hard amber durum wheat and would reduce the contract's standards for protein content, falling number, and hard vitreous kernels. The proposed and current quality specifications are shown in the table below.

Grade factor or quality standard	Current specification	Proposed specification
Minimum Test Weight	60 lbs. per bushel	58 lbs. per bushel
Maximum Heat Damaged Kernels	0.2%	0.2%
Maximum Total Damaged Kernels	2.0%	4.0%
Maximum Foreign Material	1.0%	0.7%
Maximum Shrunken and Broken Kernels	3.0%	5.0%
Maximum Total Defects	5.0%	5.0%
Maximum Total Other Classes	2.0%	2.0%
