#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it.

The Standard protects workers from the adverse health effects that may result from their exposure to methylene chloride (MC). The requirements in the Standard include worker exposure monitoring, notifying workers of their MC exposures, administering medical examinations to workers, providing examining physicians with specific program and worker information, ensuring that workers receive a copy of their medical examination results, maintaining workers' exposure monitoring and medical examination records for specific periods, and providing access to these records by OSHA, the National Institute for Occupational Safety and Health, the affected workers, and their authorized representatives.

##### II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary

for the proper performance of the agency's functions to protect workers, including whether the information is useful;

- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

##### III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Methylene Chloride Standard. The agency is requesting an adjustment increase in the burden hours amount from 61,813 hours to 65,555 hours, a difference of 3,742 hours. This increase is due increase in the number of establishments from 84,595 to 89,760.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

*Type of Review:* Extension of a currently approved collection.

*Title:* Methylene Chloride Standard.

*OMB Control Number:* 1218-0179.

*Affected Public:* Business or other for-profits.

*Number of Respondents:* 89,760.

*Number of Responses:* 251,235.

*Frequency of Responses:* Varies.

*Average Time per Response:* Varies.

*Estimated Total Burden Hours:* 65,555.

*Estimated Cost (Operation and Maintenance):* \$22,271,728.
