SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering issuing an amendment to Facility Operating License No. DPR–13, issued to Southern California Edison (SCE or licensee), that would authorize SCE to remove the off-shore portion of the Circulating Water System (CWS) from its NRC license. SCE has isolated this portion of the system from the plant and will abandon it in place. SCE requested this action in its application dated December 19, 2007, in response to which the NRC staff has prepared a safety evaluation report (SER).

The NRC staff has also prepared an environmental assessment (EA) to determine the environmental effects from the proposed action. Based on the EA, the NRC has concluded that a finding of no significant impact (FONSI) is appropriate with respect to the proposed action. The amendment will be issued to the licensee following publication of this FONSI and EA summary in the **Federal Register**.

II. EA Summary

The purpose of the proposed action is to amend the NRC license to remove the off-shore portion of the CWS from the license for San Onofre Nuclear Generating Station Unit 1. NRC verified that the licensee conducted sampling of the CWS and surrounding area, and performed dose analyses that demonstrate that the calculated dose to a member of the public is below the
