The ICR describes the nature of the information collection and its expected cost burden. The **Federal Register** Notice with a sixty day comment period soliciting comments on the following collection of information was published on October 31, 2008 [FR Vol. 73, pages 65001-65002]. No comments were received.

DATES: Written comments on this notice should be received on or before March 16, 2009 and submitted to the attention of the DOT/OST Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street, NW., Washington, DC 20503 with the associated OMB Approval Number 2105-0534 and Dockets OST-95-950.

SUPPLEMENTARY INFORMATION:

Title: Passenger Manifest Information.

OMB Control Number: 2105-0534.

Expiration Date: March 31, 2009.

Type of Review: Renewal and approval for a previously approved collection.

Respondents: All U.S. air carriers, foreign air carriers, computer reservations systems (CRSs), and travel agents doing business in the United States, and the traveling public.

Number of Respondents: 16,000, excluding travelers.

Number of Responses: 31,000,000.

Total Annual Burden: 518,000 hours.
Abstract: Public Law 101-604 (entitled the Aviation Security Improvement Act of 1990, or "ASIA 90," and later codified as 49 U.S.C. 44909) requires that certificated air carriers and large foreign air carriers collect the full name of each U.S. citizen traveling on flight segments to or from the United States and solicit a contact name and telephone number. In case of an aviation disaster, airlines would be required to provide the information to the Department of State and, in certain circumstances, to the National Transportation Safety Board. Each carrier would develop its own collection system. The Passenger Manifest Information, Final Rule (14 CFR 243) was published in the **Federal Register**, Vol. 63, No. 32 (February 18, 1998). The rule was effective March 20, 1998.

Civil Supersonic Aircraft Panel Discussion

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting participation.

SUMMARY: This notice advises interested persons that the FAA is participating in a panel session on civil supersonic aircraft research. The session will include presentations on current research programs and a question and answer session for attendees. The FAA is seeking to raise public awareness of the continuing technological advances in supersonic aircraft technology aimed at reducing the intensity of sonic boom.

DATES: The public session will take place on Sunday, March 1, 2009. The panel discussion is from 10 a.m. to 12 noon in Palm Springs, CA.

ADDRESSES: The symposium is sponsored by the University of California Davis Air Quality Research Center and it will be held at the Hilton Palm Springs Hotel, 400 East Tahquitz Canyon Way, Palm Springs, CA.

Attendance is open to all interested parties, and there are no fees to attend this session.

FOR FURTHER INFORMATION CONTACT:

Laurette Fisher, Office of Environment and Energy (AEE-100), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; facsimile (202) 267-5594, telephone (202) 267-3561.

Background: Since March 1973, supersonic flight over land by civil aircraft has been prohibited in the United States. The Concorde was the only civil supersonic airplane that offered service to the United States, but that airplane is no longer in service.

The interest in supersonic aircraft technology has not disappeared. Current research is dedicated toward reducing the impact of sonic booms as they reach the ground, in an effort to make overland flight acceptable. Recent research has produced promising results for low boom intensity, and has renewed interest in developing supersonic civil aircraft that could be considered environmentally acceptable for supersonic flight over land.

The FAA led its first panel discussion entitled, "State of the Art of Supersonics Aircraft Technology—What has progressed in science since 1973," in Chicago, IL on Friday, October 24, 2008, as part of the O'Hare Noise Compatibility Commission Symposium.

The FAA's second presentation and panel discussion will take place on Sunday, March 1, 2009, as part of the Annual University of California Symposium on Aviation Noise and Air Quality. It will be held at the Hilton Palm Springs Hotel, 400 East Tahquitz Canyon Way, Palm Springs, California.

The purpose of this panel session is to raise public awareness on advances in supersonic technology, and for the FAA, the National Aeronautics and Space Administration (NASA), and industry to get feedback from interested persons.

Public involvement is essential in any future definition of an acceptable new standard that would allow supersonic flights over land. We anticipate that this will be the second of many meetings informing the public on developments in the research of shaped sonic booms

and other technical and environmental challenges that need to be addressed in developing a new supersonic airplane.

More information about the University of California Symposium can be found at: <http://www.cevs.ucdavis.edu/Cofred/Public/Aca/ConfHome.cfm?confid=392>.

Issued in Washington, DC, on February 6, 2009.
