

alternative guidance is also included in NUREG-0654/FEMA-REP-1, Revision 2, "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants," dated December 2019 (ADAMS Accession No. ML19347D139). This change would provide EHNC with greater flexibility in staffing ERO positions. The application states that EHNC discussed the proposed changes to the emergency plan with the offsite response organizations for the State of Ohio, Ottawa County, and Lucas County, and that these organizations had no concerns.

Environmental Impacts of the Proposed Action

The proposed action consists of changes related to staffing positions, position descriptions, titles, duties, duty locations, and response times specified in the emergency plan for Davis-Besse. The on-shift, minimum, and full-augmentation ERO staffing requirements listed in the emergency plan would be revised. The proposed revisions include eliminating ERO positions; adding ERO positions; changing position descriptions, titles, duties, and duty locations; changing response times, and relocating certain position descriptions to other parts of the emergency plan or to implementing procedures.

The proposed changes would have no impact on nonradiological resources, such as land use or water resources, including terrestrial and aquatic biota, as they involve no new construction, ground disturbing activities, or modification of plant operational systems. There would be no changes to the quality or quantity of nonradiological effluents and no changes to the plant's National Pollutant Discharge Elimination System permit as a result of the proposed amendment. The overall staffing levels are not expected to increase; therefore, worker vehicle air emissions are not expected to increase, and established threshold emissions set forth in 40 CFR 93.153(b) for designated nonattainment or maintenance areas would not be exceeded. Since the proposed changes will not increase staffing levels and will not involve ground disturbing activities, modification of plant operation systems, or new construction, there would be no noticeable effect on socioeconomic conditions in the region, no environment justice impacts, and no impacts to historic and cultural resources from the proposed changes. Therefore, there would be no significant nonradiological environmental impacts associated with the proposed action.

With regard to potential radiological environmental impacts, the proposed action would not increase the probability or consequences of radiological accidents because the emergency plan must continue to meet the standards of 10 CFR 50.47(b) and the requirements in 10 CFR part 50, appendix E. There would be no change to the types or amounts of radioactive effluents that may be released and, therefore, no change in occupational or public radiation exposure from the proposed changes. Moreover, no changes would be made to plant buildings or the site property from the proposed changes. Therefore, there would be no significant radiological environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the license amendment request (*i.e.*, the "no-action" alternative). Denial of the license amendment request would result in no change to current environmental impacts. Accordingly, the environmental impacts of the proposed action and the no-action alternative would be similar.

Alternative Use of Resources

There are no unresolved conflicts concerning alternative uses of available resources under the proposed action.

Agencies and Persons Consulted

No additional agencies or persons were consulted regarding the environmental impact of the proposed action.

III. Finding of No Significant Impact

EHNC has requested a license amendment pursuant to 10 CFR 50.90 to revise the emergency plan for Davis-Besse by eliminating ERO positions; adding ERO positions; changing position descriptions, titles, duties, and duty locations; changing response times, and relocating certain position descriptions to other parts of the emergency plan or to implementing procedures. The NRC staff is considering issuance of the requested amendment.

Consistent with 10 CFR 51.21, the NRC staff conducted an EA of the proposed action, which is provided in Section II of this notice and is incorporated by reference in this FONSI. Based on this EA, the NRC staff has concluded that the proposed action will not have a significant impact on the quality of the human environment. Accordingly, the NRC staff has

determined there is no need to prepare an environmental impact statement for the proposed action.

Previous considerations regarding the environmental impacts of operating Davis-Besse, in accordance with its renewed facility operating license, are described in NUREG-1437, Supplement 52, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding Davis-Besse Nuclear Power Station," Final Report, Volumes 1 and 2 (ADAMS Accession Nos. ML15112A098 and ML15113A187, respectively), dated April 2015.

This FONSI and other related environmental documents may be examined, and/or copied for a fee, at the NRC's PDR, located at Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. Publicly available records are also accessible online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC's PDR reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by email to PDR.Resource@nrc.gov.
