Federal Railroad Administration

[Docket Number FRA–2016–0108]

Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on April 29, 2022, Union Pacific Railroad (UPRR) petitioned the Federal Railroad Administration (FRA) to extend a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR 236.566, *Locomotive of each train operating in train stop, train control, or cab signal territory: Equipped*. The relevant FRA Docket Number is FRA–2016–0108.

Specifically, UPRR requests a temporary extension of relief from § 236.566 to allow it to comply with a condition of FRA's decision letter dated April 6, 2022, primarily concerning Docket Number FRA–2021–0011.¹ The condition concerns slide detector fences, where existent, being fully integrated with positive train control (PTC) via wayside signal systems. UPRR states that four of its subdivision line segments (Portland, Evanston, Rawlins, and Laramie) require additional interconnections with PTC to be fully compliant with the condition in the April 6, 2022, letter. UPRR requests an extension of the relief in Docket Number FRA–2016–0108 for 12 months to complete the work, which consists of modifications to signaling appliances and the construction of communications infrastructure in some cases. Additionally, UPRR requests modification of two conditions of the June 9, 2020, decision letter in Docket

Number FRA–2016–0108² to allow UPRR to immediately begin to decommission its locomotives' onboard automatic train control and automatic cab signal systems.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments.
