Isabella Partners; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed Isabella Partners' application for a capacity amendment of the Isabella Hydroelectric Project No. 8377 and have prepared an Environmental Assessment (EA) for the project.¹ The licensee proposes to construct and operate a new 5-megawatt (MW) generating unit which would be located in a new 40-foot-by-45-foot concrete structure adjacent to the existing powerhouse, resulting in an increase of the project's total installed capacity from 12.8 MW to 17.8 MW. The Isabella Hydroelectric Project located on the Kern River in Kern County, California at the U.S. Army Corps of Engineers (Corps)' Isabella Dam on lands administered by the Corps.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed new generating unit, alternatives to the proposed action, and concludes that the proposed capacity amendment, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at <https://www.ferc.gov> using the "elibrary" link. Enter the docket number (P–8377–030) in the docket number field to access the document.
