SUPPLEMENTARY INFORMATION:

Title: Phytophthora Ramorum; Quarantine and Regulations.

OMB Number: 0579-0310.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture, either independently or in cooperation with States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests that are new to or not widely distributed within the United States.

In accordance with the regulations in "Subpart—Phytophthora Ramorum" (§§ 301.92 through 301.92-12), the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture restricts the interstate movement of certain articles to prevent the spread of *Phytophthora ramorum*, the plant pathogen that causes the disease commonly known as sudden oak death. The regulations contain requirements for the interstate movement of regulated articles, such as nursery stock and certain trees, from both quarantined and nonquarantined areas and involve information collection activities, including certificates, compliance agreements, and recordkeeping.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as

appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.3131 hours per response.

Respondents: Nurseries in California, Oregon, and Washington.

Estimated annual number of respondents: 1,427.

Estimated annual number of responses per respondent: 5.0644709.

Estimated annual number of responses: 7,227.

Estimated total annual burden on respondents: 2,263 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of July 2010.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
