Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

Air pollution exposure is a health risk to the U.S. diplomatic community worldwide. More than 80% of U.S. embassies and consulates are located in cities with air pollution levels above U.S. health-based standards, and air pollution exposure is linked to a range of adverse health effects. The U.S. Department of State's Bureau of Medical Services (MED) establishes and operates the Department's Medical Program to promote and maintain the physical and mental health of members of the Service, and (when incident to service abroad) other designated eligible Government employees, and members of the families of such members and employees. In addition to medical examinations for employees and

members of their families, a health care program may include health education and disease prevention programs. MED also develops and implements medical policies for the Department and advises the Secretary on global healthcare issues. MED has begun the Air Pollution and Health Monitoring Program to understand how respiratory and cardiovascular health may change during an overseas tour in locations that differ in air pollution levels, in order to inform Department policies. Data are needed on Eligible Family members who serve overseas with employees, are participants in the medical program, and are affected by policies set by the Department. Participants from the public will be Eligible Family Members of U.S. employees working at the Department of State in Washington, DC or at the U.S. Embassy in New Delhi, India; Jakarta, Indonesia; or Mexico City, Mexico. Participants will be asked to complete a questionnaire about their health and activities and visit the U.S. Department of State Exam Clinic in Washington, DC or the Health Unit of the selected U.S. Embassies overseas to have their height, weight, lung function, blood pressure, and blood oxygen saturation measured yearly over the next three years. The results will be used to implement and improve policies and mitigation programs to protect the health and well-being of the U.S. Diplomatic community. Such policies and programs may include tour length, medical clearance, health surveillance, alerts for susceptible population, and standards for exposure reduction measures.

Methodology

Participants will complete an electronic questionnaire. Questions ask about the participant's respiratory and cardiovascular health and activities. Participants will visit the Exam Clinic in Washington, DC or Health Unit of the selected U.S. Embassies. MED staff will measure their height, weight, blood pressure, and oxygen saturation. MED staff will also test their lung function by having them blow into a machine that measures air flow and lung volume. MED staff will ask the participant questions that can affect lung function values. The questionnaire and clinic visit will be repeated once a year for the next two years. Participation is voluntary, and respondents can stop participating at any time.

Kimberly Ottwell,

Deputy Medical Director.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Product Exclusions: China's Acts, Policies, and Practices Related to Technology Transfer, Intellectual Property, and Innovation

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of product exclusions.

SUMMARY: In September 2018, the U.S. Trade Representative imposed additional duties on goods of China with an annual trade value of approximately \$200 billion as part of the action in the Section 301 investigation of China's acts, policies, and practices related to technology transfer, intellectual property, and innovation. The U.S. Trade Representative initiated a product exclusion process in June 2019, and interested persons have submitted requests for the exclusion of specific products. This notice announces the U.S. Trade Representative's determination to grant certain exclusion requests, as specified in the Annex to this notice, and makes conforming amendments to certain notes in the Harmonized Tariff Schedule of the United States (HTSUS).

DATES: The product exclusions announced in this notice will apply as of September 24, 2018, the effective date of the \$200 billion action, to August 7, 2020. The amendments announced in this notice are retroactive to the date the original exclusions were published.

FOR FURTHER INFORMATION CONTACT: For general questions about this notice, contact Assistant General Counsels Philip Butler or Benjamin Allen, or Director of Industrial Goods Justin Hoffmann at (202) 395-5725. For specific questions on customs classification or implementation of the product exclusions identified in the Annex to this notice, contact traderemedy@cbp.dhs.gov.
