

The DG–1351 was issued originally for public comment on July 5, 2018 (83 FR 31429), and it endorsed NEI 15–03, Revision 2, with exceptions and clarifications. On October 17, 2019, the NRC staff held a public meeting to discuss the staff’s disposition of public comments on DG–1351. Subsequently, by letter dated April 9, 2020, the NEI submitted Revision 3 of NEI 15–03 to address the exceptions and clarifications in DG–1351. The NRC review of the April 9 submittal determined that NEI 15–03, as revised, is acceptable and addresses the exceptions and clarifications in DG–1351. As a result, the NRC revised DG–1351 to remove the exceptions and clarifications. Members of the public that submitted comments on the July 5, 2018, version of DG–1351 and believe

such comments are not adequately addressed in the updated DG–1351, Revision 1, are encouraged to resubmit their comments or provide additional comments.

If the NRC finalizes DG–1351, Revision 1, and issues RG 1.239, then the NRC would also withdraw Administrative Letter (AL) 98–10, “Dispositioning of Technical Specifications That Are Insufficient to Assure Plant Safety.”

**III. Backfitting, Forward Fitting, and Issue Finality**

DG–1351, Revision 1, if finalized, would provide guidance on licensee actions to address nonconservative technical specifications. Issuance of DG–1351, Revision 1, if finalized, would not constitute backfitting as defined in title 10 of the *Code of Federal*

*Regulations* (10 CFR) section 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; constitute forward fitting as that term is defined and described in MD 8.4; or affect the issue finality of any approval issued under 10 CFR part 52, “Licenses, Certificates, and Approvals for Nuclear Power Plants.” As explained in this DG, applicants and licensees are not required to comply with the positions set forth in this DG.
