

Major Facility and Mid-scale RIs and enable the most efficient and cost-effective delivery of tools to the research and education communities.

Submitting proposals and subsequent documentation related to the development, design, construction or implementation, and operations of a Major Facility or Mid-scale RI to NSF is part of the information collected that NSF uses to fulfill its responsibility to support merit-based research and education projects in all the scientific and engineering disciplines. NSF is also committed to providing oversight on RI, which they must balance against monitoring its information collection to identify and address any excessive reporting burdens.

NSF has approximately 25 Major Facilities in various stages of Development, Design, Construction, Operations, and Disposition. Major Facilities undergoing a significant upgrade may be classified in both design or construction and operations at the same time. Two to four new construction awards are made approximately every five years based on science community RI needs and availability of funding. Among the 25 Major Facilities, there are approximately seven (7) facilities annually that are either in Design or Construction Stages. These stages require the highest level of reporting and management documentation per the *RIG*. Currently, there are approximately 27 Mid-scale Research Infrastructure in the Track1 Program and nine in the Track 2 Program.

Burden on the Public: NSF estimates that approximately five Full Time Equivalents (FTEs) are necessary for each Major Facility in design or construction to respond to NSF performance and financial reporting and project management documentation requirements on an annual basis; or 10,400 hours per year. NSF estimates approximately one and half (1.5) FTE for a Major Facility in operations to respond to performance and financial reporting on an annual basis; or 3,120 hours per year. For Mid-scale RI, NSF estimates approximately one (1) FTE is necessary for each Mid-Scale RI to respond to NSF project management documentation requirements on an annual basis; or 2,080 hours per year. With seven (7) Major Facilities in design or construction and twenty-one (20) in operations and four (4) Mid-scale RI, this equates to roughly 150,000 public burden hours annually.

Comments: In addition to the previously mentioned types of comments, feedback is also invited on the following:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility;

(b) the accuracy of the Agency's estimate of the burden of the proposed collection of information;

(c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and

(d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

After obtaining and considering public comment, NSF will prepare the submission requesting OMB clearance of this collection for no longer than 3 years.

Dated: January 3, 2025.
