

area affected by the site. Council members and alternates for the Wisconsin Shipwreck Coast National Marine Sanctuary Advisory Council serve two or three-year terms, as reflected in the signed charter.

More information on advisory council membership and processes, and materials related to the purpose, policies, and operational requirements for advisory councils can be found in the charter for a particular advisory council ([https://sanctuaries.noaa.gov/management/ac/council\\_charters.html](https://sanctuaries.noaa.gov/management/ac/council_charters.html)) and the National Marine Sanctuary Advisory Council Implementation Handbook (<https://nmssanctuaries.blob.core.windows.net/sanctuaries-prod/media/archive/management/pdfs/2010-ac-handbook-appendices-07162015.pdf>). For more information about the new advisory council for the Wisconsin Shipwreck Coast National Marine Sanctuary, including seat descriptions and application materials, please visit <https://sanctuaries.noaa.gov/wisconsin/involved>.

#### *B. Paperwork Reduction Act*

ONMS has a valid Office of Management and Budget (OMB) control number (0648–0397) for the collection of public information related to the processing of ONMS national marine sanctuary advisory council applications across the National Marine Sanctuary System. Establishing a sanctuary advisory council for Wisconsin Shipwreck Coast National Marine Sanctuary fits within the estimated reporting burden under that control number. See <https://www.reginfo.gov/public/do/PRASearch> (Enter Control Number 0648–0397). Therefore, ONMS will not request an update to the reporting burden certified for OMB control number 0648–0397.

Send comments regarding this burden estimate, or any other aspect of this data collection, including suggestions for reducing the burden, to: Office of National Marine Sanctuaries, 1305 East West Highway, N/NMS, Silver Spring, Maryland 20910.

Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, unless that collection of information displays a currently valid Office of Management and Budget (OMB) control number. The OMB control number is #0648–0397.

*Authority:* 16 U.S.C. 1431 *et seq.*

**John Armor,**  
*Director, Office of National Marine Sanctuaries, National Ocean Service, National Oceanic and Atmospheric Administration.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648–XC298]

#### Endangered and Threatened Species; Take of Anadromous Fish

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), U. S. Department of Commerce.

**ACTION:** Notice of receipt of application, for one scientific enhancement permit application and request for comment.

**SUMMARY:** Notice is hereby given that NMFS has received one permit application submitted by FISHBIO Environmental, LLC. (FISHBIO) to enhance the propagation and survival of species listed under the Endangered Species Act (ESA) of 1973, as amended, for a 5 year period. This document serves to notify the public of the availability of the renewal permit application for review and comment, prior to a decision by NMFS whether to issue the permit application may be viewed online at: [https://apps.nmfs.noaa.gov/preview/preview\\_open\\_for\\_comment.cfm](https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm).

**DATES:** Written comments on the permit application must be received at the appropriate email address (see **ADDRESSES**) on or before September 28, 2022.

**ADDRESSES:** Written comments on the permit application should be submitted to NMFS California Central Valley Office via email to Meiling Colombano ([meiling.colombano@noaa.gov](mailto:meiling.colombano@noaa.gov)).

**FOR FURTHER INFORMATION CONTACT:** Meiling Colombano (email: [meiling.colombano@noaa.gov](mailto:meiling.colombano@noaa.gov); phone: 916–204–3406). Permit application instructions are available online at <https://apps.nmfs.noaa.gov>.

#### SUPPLEMENTARY INFORMATION:

#### ESA-Listed Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*): Threatened, naturally produced and hatchery propagated Central Valley (CV) spring-run;

Steelhead (*O. mykiss*): Threatened, naturally produced and artificially propagated California Central Valley (CCV) Distinct Population Segment of steelhead;

North American green sturgeon (*Acipenser medirostris*): Threatened, naturally produced southern Distinct Population Segment (sDPS) of North American green sturgeon.

#### Authority

Scientific research and enhancement permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR 222–227). NMFS issues permits based on findings that such permits (1) are applied for in good faith, (2) would not operate to the disadvantage of the listed species which are the subject of the permits, and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. Authority to take listed species is subject to conditions set forth in the permits.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and any comment submitted to determine whether the application meets the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period and consideration of any comment submitted therein. NMFS will publish notice of the final action on the subject permit application in the **Federal Register**.

Those individuals requesting a hearing on the application listed in this notice should provide the specific reasons why a hearing on the application would be appropriate (see **ADDRESSES**). Such a hearing is held at the discretion of the Assistant Administrator for Fisheries, NOAA.

All statements and opinions contained in the permit action summary are those of the applicant and do not necessarily reflect the views of NMFS.

#### Permit Application Received

##### *Permit 21477–2R*

FISHBIO has applied for a renewal enhancement permit under section 10(a)(1)(A) of the ESA for a period of 5 years that would allow take of both adult and juvenile CV spring-run Chinook salmon, CCV steelhead, and sDPS green sturgeon. Federal legislation (section 4010 of the Water Infrastructure Improvement for the Nation Act (WIIN Act); December 16, 2016) requires the Oakdale Irrigation District and South

San Joaquín Irrigation District (Districts) and NMFS to jointly establish a nonnative predator research and pilot fish removal program in the Stanislaus River to investigate whether nonnative predator removal is an effective strategy to improve overall conditions for native fish, especially the survival of juvenile salmonids. The general approach of the program is intended to build off previous nonnative predator removal studies conducted in the Central Valley, as well as build off of the previous 5 years of data collected under the first permit (21477). The program will allow examination of the biological and ecological responses of both ESA-listed and non-federally listed native fish (particularly salmonids) and the fish community in relation to predator exclusion and removal efforts. Specific study questions will focus on changes in the densities and relative abundances in these native fish and fish community assemblages.

The program will be carried out using three primary methods: (1) An exclusion weir equipped with a live box (or fyke trap) will be used to trap and remove nonnative predatory fish. Native fish will be trapped daily and selectively passed upstream of the weir to reduce the potential for in-trap predation and minimize delays in migration; (2) sampling via boat electrofishing is proposed to estimate the abundance of nonnative predators and to conduct predator removals; and (3) survival will be assessed by conducting releases of hatchery-origin Chinook salmon juveniles, fitted with acoustic tags, upstream of areas where predator removal has occurred.

Although ESA-listed species are not directly targeted by the program, they may be incidentally captured and handled during electrofish sampling. Efforts will be made to limit electrofishing in areas where juvenile salmonids may be present or rearing. Electrofishing will follow guidelines to minimize injury and mortality and established measures will be taken to protect species listed under the ESA. The proposed operation of a weir in the Stanislaus River could impact ESA-listed species by delaying upstream migration of the adult lifestage. Additionally, trapping at the weir may result in the capture of adult ESA-listed species. These effects will be minimized by frequent (at least daily) trap checks at the site and prioritization of ESA-listed species for handling and release prior to other non-listed species.

#### Public Comments Solicited

NMFS invites the public to comment on the section 10(a)(1)(A) renewal

enhancement permit application during a 30-day public comment period beginning on the date of this notice. This notice is provided pursuant to section 10(c) of the ESA (16 U.S.C. 1529(c)). All comments and materials received, including names and addresses, will become part of the administrative record and may be released to the public. We provide this notice in order to allow the public, agencies, or other organizations to review and comment on these documents.

#### Next Steps

NMFS will evaluate the permit application, associated documents, and comments submitted to determine whether the application meets the requirements of section 10(a)(1)(A) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day public comment period and after NMFS has fully considered all relevant comments received. NMFS will publish notice of its final action in the **Federal Register**.

Dated: August 23, 2022.

**Lisa Manning,**

*Acting Chief, Endangered Species Division,  
Office of Protected Resources, National  
Marine Fisheries Service.*

#### Marine Mammals; File No. 26594

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; receipt of application.

**SUMMARY:** Notice is hereby given that Ann Zoidis, Cetos Research Organization 51 Kebo Ridge Road, Bar Harbor, ME 04609, has applied in due form for a permit to conduct research on marine mammals.

**DATES:** Written, telefaxed, or email comments must be received on or before September 28, 2022.

**ADDRESSES:** The application and related documents are available for review by selecting “Records Open for Public Comment” from the “Features” box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 26594 from the list of

available applications. These documents are also available upon written request via email to [NMFS.Pr1Comments@noaa.gov](mailto:NMFS.Pr1Comments@noaa.gov).

Written comments on this application should be submitted via email to [NMFS.Pr1Comments@noaa.gov](mailto:NMFS.Pr1Comments@noaa.gov). Please include File No. 26594 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to [NMFS.Pr1Comments@noaa.gov](mailto:NMFS.Pr1Comments@noaa.gov). The request should set forth the specific reasons why a hearing on this application would be appropriate.

#### FOR FURTHER INFORMATION CONTACT:

Shasta McClenahan, Ph.D., or Erin Markin, Ph.D., (301) 427–8401.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant requests a 5-year permit to take marine mammals in the Atlantic and Pacific oceans to study population size, distribution, habitat use, and behavior. Up to 32 species of cetaceans may be targeted for research including the following ESA-listed species: blue (*Balaenoptera musculus*), fin (*Balaenoptera physalus*), false killer (*Pseudorca crassidens*; Main Hawaiian insular distinct population segment), North Atlantic right (*Eubalaena glacialis*), sei (*Balaenoptera borealis*), and sperm (*Physeter macrocephalus*) whales. Researchers would conduct vessel surveys and aerial surveys (manned and unmanned), for counts, observations, above water and underwater photography and video recording, photo-identification, photogrammetry, passive acoustic recording, biological sampling (sloughed skin, feces, and skin and blubber biopsy), and suction-cup tagging. Biological samples may be imported and exported for analysis. ESA-listed Hawaiian monk seals (*Neomonachus schauinslandi*) may be harassed during research. See the application for numbers of animals requested by species and procedure.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to
