 3.3.00.02b (770), and 3.3.00.02f (774).

The ITAAC for VEGP Unit 3 are in
 Appendix C of the VEGP Unit 3
 combined license (ADAMS Accession
 No. ML14100A106). The ITAAC for
 VEGP Unit 4 are in Appendix C of the
 VEGP Unit 4 combined license (ADAMS
 Accession No. ML14100A135).

II. Licensee ITAAC Post-Closure Notifications (IPCNs)

Since the last **Federal Register** notice
 of the NRC staff's determinations of
 successful completion of inspections,
 tests, and analyses for VEGP Units 3 and
 4 (87 FR 5866; February 2, 2022), the
 NRC staff has not made additional
 determinations of the successful
 completion of inspections, tests, and
 analyses based on licensee IPCNs
 submitted under 10 CFR 52.99(c)(2).

III. NRC Staff Determination of Completion of ITAAC

The NRC staff has determined that the specified inspections, tests, and analyses have been successfully completed, and that the specified acceptance criteria are met. The documentation of the NRC staff's determination is in the ITAAC Closure Verification Evaluation Form (VEF) for each ITAAC. The VEF is a form that represents the NRC staff's structured process for reviewing ICNs and IPCNs.

Each ICN presents a narrative description of how the ITAAC was completed. The NRC's ICN review process involves a determination on whether, among other things: (1) each ICN provides sufficient information, including a summary of the methodology used to perform the ITAAC, to demonstrate that the inspections, tests, and analyses have been successfully completed; (2) each ICN provides sufficient information to demonstrate that the acceptance criteria of the ITAAC are met; and (3) any NRC inspections for the ITAAC have been completed and any ITAAC findings associated with that ITAAC have been closed. The NRC's review process for IPCNs is similar to that for ICNs but focuses on how the licensee addressed the new, material information giving rise to the IPCN.

The NRC staff's determination of the successful completion of these ITAAC for VEGP Unit 3 is final because the NRC has found pursuant to 10 CFR 52.103(g) that the acceptance criteria in the VEGP Unit 3 combined license are met (87 FR 48201; August 8, 2022). As such, the licensee is allowed to operate VEGP Unit 3 in accordance with the terms and conditions of the license. In accordance with 10 CFR 52.103(h), the ITAAC in the VEGP Unit 3 licensee no longer constitute regulatory requirements.

The NRC staff's determination of the successful completion of these ITAAC for VEGP Unit 4 is based on information available at this time and is subject to the licensee's ability to maintain the condition that the acceptance criteria are met. If the NRC staff receives new information that suggests the NRC staff's determination on any of these ITAAC is incorrect, then the NRC staff will determine whether to reopen that ITAAC (including withdrawing the NRC staff's determination on that ITAAC). The NRC staff's determination will be used to support a subsequent finding, pursuant to 10 CFR 52.103(g), at the end of construction that all acceptance criteria in the combined license are met. The ITAAC closure process is not

finalized for these ITAAC until the NRC makes an affirmative finding under 10 CFR 52.103(g). Any future updates to the status of these ITAAC can be found by selecting the link "ITAAC Status Report" on the NRC's website: <https://www.nrc.gov/reactors/new-reactors/col-holder/vog4.html>.

This notice fulfills the NRC staff's obligations under 10 CFR 52.99(e)(1) to publish a notice in the **Federal Register** of the NRC staff's determination of the successful completion of inspections, tests, and analyses.
