

relevant period, the subject company did not import plywood or shift production of plywood overseas and that the subject company's only customer did not import plywood.

The Union requests that the Department investigate whether the subject company or its customers imported oriented strand board (OSB), a product which is like and directly competitive with plywood.

The Department has carefully reviewed the Union's request for reconsideration and has determined that the Department will conduct further investigation.

### Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 12th day of September 2006.

#### SUPPLEMENTARY INFORMATION:

I. *Background:* The ETA 205 reports preliminary information on the taxation efforts in states relative to taxable and total wages and allows for comparison among states. The information is used for projecting unemployment insurance tax revenues for the Federal budget process as well as for actuarial analyses of the Unemployment Trust Fund. The data is published in several forms and is often requested by data users. In addition, this report helps to fulfill two statutory requirements. Section 3302(d)(7) of the Federal Unemployment Tax Act (FUTA) requires the Secretary of Labor to determine and notify "the Secretary of the Treasury before June 1 of each year, on the basis of a report furnished by such state to the Secretary of Labor before May 1 of such year" of certain percentages computed according to sections 3302(c)(2)(B) and (C) from the average tax rates for states with outstanding Title XII advances, which are then used to calculate the loss of FUTA offset credit for these states. In addition, the tax schedules are used to assure that states are in compliance with provisions of the Tax Equity and Fiscal Responsibility Act (Pub. L. 97-248), section 281.

II. *Review Focus:* The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarify of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
