Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to the EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office.

Federal advisory committees and panels, including scientific advisory committees, provide independent advice to the EPA. Members of the public can submit relevant comments on the topic of this advisory activity, including the charge to the panel and the EPA review documents, and/or the group conducting the activity, for the SAB to consider during the advisory process. Input from the public to the SAB will have the most impact if it consists of comments that provide specific scientific or technical information or analysis for the SAB panel to consider or if it relates to the clarity or accuracy of the technical information.

Oral Statements: In general, individuals or groups requesting an oral presentation at the will be limited to five minutes per speaker. Interested parties should contact Dr. Holly Stallworth, DFO, in writing (preferably via email), at the contact information noted above by November 15, 2019, to be placed on the list of public speakers for the public meeting. For the public teleconferences, deadlines for contacting Dr. Stallworth to be placed on the list of speakers are December 5, 2019, and January 25, 2020, respectively.

Written Statements: Written statements will be accepted throughout the advisory process; however, for timely consideration by Panel members, statements should be supplied to the DFO (preferably via email) at the contact information noted above by November 15, 2019, for consideration at the public meeting on November 22, 2019. For the public teleconferences, the deadlines for submitting written comments are December 5, 2019, and January 25, 2020, respectively. It is the SAB Staff Office general policy to post written comments on the web page for the advisory meeting or teleconference. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its website. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the SAB website. Copyrighted material will not

be posted without explicit permission of the copyright holder.

Accessibility: To request accommodation of a disability, please contact Dr. Stallworth at 202-564-2073 or stallworth.holly@epa.gov. To request accommodation of a disability please contact Dr. Stallworth, preferably at least ten days prior to the teleconference, to give the EPA as much time as possible to process your request.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Since 1988, the Environmental Protection Agency (EPA) has maintained a Federal Agency Hazardous Waste Compliance Docket ("Docket") under section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Section 120(c) requires EPA to establish a Docket that contains certain information reported to EPA by Federal facilities that manage hazardous waste or from which a reportable quantity of hazardous substances has been released. As explained further below, the Docket is used to identify Federal facilities that should be

evaluated to determine if they pose a threat to public health or welfare and the environment and to provide a mechanism to make this information available to the public. This notice identifies the Federal facilities not previously listed on the Docket and also identifies Federal facilities reported to EPA since the last update on April 29, 2019. In addition to the list of additions to the Docket, this notice includes a section with revisions of the previous Docket list and a section of Federal facilities that are to be deleted from the Docket. Thus, the revisions in this update include zero additions, three deletions, and zero corrections to the Docket since the previous update. At the time of publication of this notice, the new total number of Federal facilities listed on the Docket is 2,372.

DATES: This list is current as of October 10, 2019.
