Proposed Project

Applied Research to Address Emerging Public Health Priorities—New—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID),

Centers for Disease Control and Prevention (CDC).

Background and Brief Description

On March 27, 2017, CDC issued a Broad Agency Announcement (FY2017–OADS–01) available at <https://www.fbo.gov/spg/HHS/CDC/PGOA/FY2017-OADS-01/listing.html>. There is potential for standardized information collection attached to a limited number of awarded projects. For those projects, a 30-day notice will be published in the **Federal Register** and information collection requests will be submitted to OMB for approval. This **Federal Register** notice is intended to broadly inform the public of CDC’s intent to contract with researchers to carry out a variety of different research projects awarded through this announcement.

For this announcement, CDC has identified the following research areas of interest. Interested parties are invited to consider innovative approaches to support advanced research and development strategies in the following research areas of interest:

1. New diagnostic, sequencing and metagenomic tools for antibiotic detection and improved antibiotic use
2. International Transmission, colonization, and prevention of antibiotic resistance (AR) pathogens
3. Domestic transmission, colonization, and prevention of antibiotic resistance pathogens and *Clostridium difficile* infections (CDI)
4. Microbiome disruption
5. Antibiotic resistance pathogens and genes in water systems and the environment and their contribution to human infections
6. Medication safety and antibiotic stewardship
7. Improving the timeliness, accuracy, and usability of public health emergency management, surveillance and survey information data

Contracts that are awarded based on responses to this BAA are as a result of full and open competition and therefore in full compliance with the provisions of PL 98–369, “The Competition in Contracting Act of 1984.” CDC contracts with educational institutions, nonprofit organizations, state and local government, and private industry for research and development (R&D) in those areas covered in this BAA.

The public is invited to look at the BAA online for greater detail and more specific research areas falling under the seven topics listed above.

Authorizing legislation comes from Section 301 of the Public Health Service Act. Responses will be voluntary and it is not expected that there will be any

cost to respondents other than the time to participate in information collection.

The total estimated burden for all of the information collections is not expected to exceed 1,500 hours (100

hours of burden for a maximum of 15 potentially PRA-applicable contracts).

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)	Total burden (in hrs.)
Public	Information Collection	150	1	1	1,500
Total					1,500
