B. Regulatory History and Information

On February 19, 2015, we published an NPRM entitled “Commercial Diving Operations” (80 FR 9152) that proposed amendments to our regulations for commercial diving conducted from deepwater ports or deepwater port safety zones, or in connection with Outer Continental Shelf (OCS) activities, or from vessels that are required to have a Coast Guard certificate of inspection. The NPRM would revise and update current regulations to improve safety and to reflect current industry best practices. The NPRM would also allow the Coast Guard to approve independent third-party organizations to assist in ensuring compliance with commercial diving regulations. All comments on the NPRM, including comments on the proposed collection of information, were due by May 20, 2015. In the course of reviewing comments on the NPRM, we became aware of several errors on our part.

First, on page 9175 of the NPRM, our proposed regulatory text for 46 CFR 197.200 contained two unintended changes in the applicability of subpart B. We do not intend, despite the proposed language for § 197.200(a)(3), to extend applicability to commercial diving operations involving any vessel operating on the navigable waters of the United States. Nor do we intend, despite the proposed language for § 197.200(a)(5), to remove from applicability those U.S. vessels engaged in an OCS activity as defined in 33 CFR part 140, or connected to a deepwater port as defined in 33 CFR part 150. In a final rule, in § 197.200, we would remove paragraph (a)(3), remove the words “foreign flagged” from paragraph (a)(5), and renumber paragraphs in accordance with this change. As we stated in Table 2 on page 9156 of the NPRM, our intentions for § 197.200 are only to add paragraph (d) concerning

foreign vessels, and to improve the clarity of our existing provisions, without making any other changes to the substance of the applicability provisions of subpart B.

Second, we provided incorrect telephone and email contact information for those wishing to view material proposed for incorporation by reference on pages 9158 and 9159 of the NPRM. To make arrangements to view that material, please contact Mr. Ken Smith (*see* **FOR FURTHER INFORMATION CONTACT**).

Third, throughout the NPRM comment period that ended May 20, 2015, the Preliminary Regulatory Analysis and Interim Regulatory Flexibility Analysis document for the NPRM was unavailable in the rulemaking docket. We corrected that omission in June 2015, and that document is currently available at <http://www.regulations.gov> as docket number USCG-1998-3786-0195.

This notice is issued under authority of 5 U.S.C. 552(a).

Dated: August 18, 2015.

J.G. Lantz,

Director of Commercial Regulations and Standards, U.S. Coast Guard.

SUPPLEMENTARY INFORMATION: This is a summary of the Bureau's Public Notice, DA No. 15-865; WT Docket No 15-180, released July 28, 2015. The full text of this document is available for inspection and copying during business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW., Room CY-A257, Washington, DC 20554. Copies of the Public Notice also may be obtained via ECFS by entering the docket number WT Docket 15-180; DA No. 15-865. Additionally, the complete item is available on the Federal Communications Commission's Web site at <http://www.fcc.gov>.

By this Public Notice, the Bureau releases a scoping document (the section 106 Scoping Document) and invites input on a new program alternative to improve and facilitate the review process for deployments of small wireless communications facilities, including Distributed Antenna Systems (DAS) and small cell facilities, under section 106 of the National Historic Preservation Act (NHPA), 54 U.S.C. 306108. In particular, the attached section 106 Scoping Document describes options and seeks public input on potentially amending the *Nationwide Programmatic Agreement for the Collocation of Wireless Antennas* (Collocation Agreement), 47 CFR part 1, App. B, to address the historic preservation review of deployments of small wireless communications facilities under section 106. Copies of the section 106 Scoping Document are also being sent to State Historic Preservation Officers (SHPOs), Tribal and Native Hawaiian cultural preservation officials (including Tribal Historic Preservation Officers (THPOs)), and other stakeholders. By this Public Notice, the Bureau also initiates and invites government-to-government consultation with Federally-recognized Tribal Nations.

As described more fully in the section 106 Scoping Document, new and additional infrastructure deployments are necessary to meet the increasing demand for advanced wireless services and greater wireless bandwidth. Many wireless providers are deploying new infrastructure technologies, particularly DAS and small cells, in order to increase coverage and capacity in indoor and outdoor environments. Because DAS networks and small cell facilities use radio spectrum licensed by the Commission, the installation of these facilities on utility poles, buildings, and other existing structures is acknowledged as a Commission undertaking under section 106 of the NHPA. The Commission's rules require applicants to follow the regulations of the Advisory Council on Historic Preservation (ACHP), as modified by two Nationwide Programmatic Agreements (NPAs) executed by the Commission with the ACHP and the National Conference of State Historic
