Information pertaining to the requirement to be submitted:

- 1. The title of the information collection: 10 CFR part 21, "Reporting of Defects and Noncompliance".
- 2. Current OMB approval number: 3150–0035.
- 3. How often the collection is required: On occasion.
- 4. Who is required or asked to report: All directors and responsible officers of firms and organizations building, operating, or owning NRC licensed facilities as well as directors and responsible officers of firms and organizations supplying basic components and safety related design, analysis, testing, inspection, and consulting services of NRC licensed facilities or activities.

It requires directors and responsible officers of firms and organizations building, operating, owning, or supplying basic components to NRC licensed facilities or activities to report defects and noncompliance that

could create a substantial safety hazard at NRC licensed facilities or activities. Organizations subject to 10 CFR part 21 are also required to maintain such records as may be required to assure compliance with this regulation.

The NRC staff reviews 10 CFR Part 21 reports to determine whether the reported defects in basic components and related services and failure to comply at NRC licensed facilities or activities are potentially generic safety problems.

- 1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
 - 2. Is the burden estimate accurate?

PPL Susquehanna, Llc; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License (OL) Nos. NPF-14 and NPF-22, issued to PPL Susquehanna, LLC (the licensee), for operation of the Susquehanna Steam Electric Station (SSES), Units 1 and 2, located in Luzerne County, Pennsylvania.

The proposed amendments would change the OL and Technical Specifications for SSES Units 1 and 2, to reflect an increase in the licensed core power level to 3489 megawatts (thermal), 1.4% greater than the current level.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By May 25, 2001, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in a proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2.
