Description: The National Compensation Survey (NCS) is an ongoing survey of earnings and benefits among private firms, State, and local

government. The NCS resulted from the merger of three surveys: The NCS earnings and work level data (formerly the Occupational Compensation Survey Program), the Employment Cost Index, and the Employee Benefits Survey. Data from these surveys are critical for setting Federal white-collar salaries, determining monetary policy (as a

Principal Federal Economic Indicator), and for compensation administrators and researchers in the private sector.

The survey will collect data from a sample of employers. These data will consist of information about the duties, responsibilities, and compensation (earnings and benefits) for a sample of occupations for each sampled employer.
