

surveyed, it is estimated that 95% of persons will meet the eligibility criteria and 98% will be able to provide informed consent, as determined by the consent comprehension test. Therefore, the goal will be to interview a sample of 600 persons annually for two years;

300 in each of the two project areas of Baltimore and Philadelphia. The structured interview will take approximately 20 minutes to complete. Participation is voluntary. Data collection will provide important insights into the relationship between

psychiatric illness and risk behaviors for HIV.

There is no cost to the respondents other than their time. The total annualized burden hours are 313.
