\* The Standards Council of Canada (SCC) voted to end its Laboratory

Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory (**Federal Register**, July 16, 1996) as meeting the minimum standards of the Mandatory Guidelines published in the **Federal Register** on January 23, 2017 (82 FR 7920). After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in the NLCP certification maintenance program.

**SUMMARY:** On March 31, 2022, the Coast Guard published a notice of study and request for comments announcing commencement of an Approaches to Maine, New Hampshire, and Massachusetts Port Access Route Study (MNPARS). This notice announces the availability of a draft report for public review and comment. The Coast Guard is seeking public comments on the content, proposed routing measures, and development of the report. The recommendations of this study may lead

to future rulemakings or appropriate international agreements.

**DATES:** All comments and related material must be received on or before February 2, 2022. Commenters should be aware that the electronic Federal Docket Management System will not accept comments after midnight, Eastern Daylight Time, on the last day of the comment period.

#### **I. Table of Abbreviations**

DHS Department of Homeland Security  
MNMPARS Approaches to Maine, New Hampshire, and Massachusetts Port Access Route Study  
PARS Port Access Route Study  
TSS Traffic Separation Scheme  
USCG United States Coast Guard

#### **II. Background and Purpose**

Under section 70003 of title 46 of the United States Code (46 U.S.C. 70003(c)), the Commandant of the U.S. Coast Guard (USCG) may designate necessary fairways and traffic separation schemes (TSSs) to provide safe access routes for vessels proceeding to and from U.S. ports. The designation of fairways and TSSs recognizes the paramount right of navigation over all other uses in the designated areas.

Before establishing or adjusting fairways or TSSs, the USCG must conduct a Port Access Route Study (PARS), *i.e.*, a study of potential traffic density and the need for safe access routes for vessels. Through the study process, the USCG must coordinate with federal, state, tribal, and foreign state agencies (where appropriate) and consider the views of maritime community representatives, environmental groups, and other stakeholders. The primary purpose of this coordination is, to the extent practicable, to reconcile the need for safe access routes with other reasonable waterway uses such as anchorages, construction, operation of renewable energy facilities, marine sanctuary

operations, commercial and recreational activities, and other uses.

On March 31, 2022, the Coast Guard commenced an Approaches to Maine, New Hampshire, and Massachusetts Port Access Route Study (MNMPARS) by publishing a notice of study and request for comments in the **Federal Register** (87 FR 18800). The purpose of the MNMPARS is to evaluate the adequacy of existing vessel routing measures and determine whether additional vessel routing measures are necessary for port approaches to Maine, New Hampshire, and Massachusetts and international and domestic transit areas in the First Coast Guard District area of responsibility.

On June 28, 2022, the First Coast Guard District published a 60-day Notification of Inquiry and Public Meetings; request for comments (87 FR 38418). This supplemental notice announced a schedule for six public meetings and sought additional public comments concerning more specific navigational safety issues. The notification requested responses to several general and port-specific questions that were based on analysis of historical traffic data and public comments received from the original Notice of Study. Of the six public meetings, four were conducted in both in-person and virtual formats, one was in-person only, and one was virtual only.

During both comment periods a total of 30 comments were submitted by representatives of the maritime community, Federal and State governmental agencies, environmental groups, non-governmental organizations, and other stakeholders. Comments were provided during public meetings, via email, and submitted directly to the electronic docket. Oral comments provided during public meetings can be viewed in the individual meeting recordings posted to the “Documents” section of the public docket.

The USCG is opening this third MNMPARS comment period to facilitate transparent public feedback on the content and findings included in the draft report of this study.

#### **III. Information Requested**

The USCG is seeking all public comments on the content and recommendations contained in the study draft report. All comments received will be reviewed and considered before a final version of the PARS is announced in the **Federal Register**.
