Carriers are required to elect one of three paths implementing rural high cost reform. Carriers electing Path One must certify that it will not disaggregate and target support. Carriers selecting Path Two must file a disaggregation plan. Carriers selecting Path Three must self-certify and provide a description of the rationale used to disaggregate support, including the methods and data and a discussion of how the plan complies with the self-certification guidelines, among other things. Rural carriers that elect to disaggregate and target per-line support under either Path Two or Three are required to report loops at the cost-zone level. States are required to file annual certifications to ensure that carriers use universal service support only for the provision, maintenance and upgrading of facilities and services for which the support is intended consistent with Section 254(e). The Commission requires the filing of line count data on a regular quarterly basis upon competitive entry into rural carrier study areas. Carriers must provide written notice in conjunction with their annual or quarterly submissions to NECA indicating that a study area meets the 14% TPIS trigger. Rural carriers must provide written notice when their index year has been established for the purposes of calculating eligibility for safety value support.
