Background and Purpose

For the reasons discussed in a notice of workshop, published in the **Federal Register** on December 17, 2001 (66 FR 65020), the Coast Guard will conduct a public workshop to assess existing marine transportation systems (MTS) security standards and measures and to gather ideas on possible improvements. We request workshop attendees to provide information about all Federal, State, and local government laws, procedures, regulations, and standards that are either functioning or that are planned. We will provide copies of international standards and Coast Guard regulations concerning the security of MTS. We also request industry to provide any current and planned standards and procedures covering the security of vessels and facilities.

The prior notice outlined general topics that will be focused on during the workshop, though it did not contain a specific agenda. Workshop attendees will be asked to divide into four workgroups to discuss the physical security and operational measures for facilities, vessels, and ports, as well as identification or credentialing measures that could be used to control access to facilities, vessels, or sensitive areas. Each workgroup's goal will be to develop criteria, measures to meet such criteria, and possible security performance standards for the criteria within their area of concentration. On Tuesday afternoon, January 29, 2002 the workgroups will summarize the results of their discussions in a brief presentation. Attendees will be provided an opportunity to comment on the impact, cost, and estimated value of the criteria, measures, and standards developed during this workshop. The workshop presentations will be included in the docket by February 4, 2002. The final workshop report will be placed in the docket by February 28, 2002. Comments on the workshop presentations will be accepted until March 15, 2002 as opposed to February 14, 2002, and should be sent to the Docket Management Facility at the address under **ADDRESSES**.
