

Association of State Utility Consumer Advocates' Petition for Declaratory Ruling Regarding Truth-in-Billing, Second Report and Order, Declaratory Ruling, and Second Further Notice of Proposed Rulemaking, CC Docket No. 98–170, CG Docket No. 04–208, (2005 *Second Report and Order and Second Further Notice*); published at 70 FR 29979 and 70 FR 30044, May 25, 2005, which determined, inter alia, that Commercial Mobile Radio Service providers no longer should be exempted from 47 CFR 64.2401(b), which requires billing descriptions to be brief, clear, non-misleading and in plain language. The 2005 *Second Further Notice* proposed and sought comment on measures to enhance the ability of consumers to make informed choices among competitive telecommunications service providers. On April 27, 2012, the Commission released the Empowering Consumers to Prevent and Detect Billing for Unauthorized Charges (“Cramming”), Report and Order and Further Notice of Proposed Rulemaking, CG Docket No. 11–116, CG Docket No. 09–158, CC Docket No. 98–170, FCC 12–42 (*Cramming Report and Order and Further Notice of Proposed Rulemaking*); published at 77 FR 30972, May 24, 2012, which determined that additional rules are needed to help consumers prevent and detect the placement of unauthorized charges on their telephone bills, an unlawful and fraudulent practice commonly referred to as “cramming.”

Total Annual Burden: 16,320 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission launched the Disaster Information Reporting System (DIRS) in 2007 pursuant to its mandate to promote the safety of life and property through the use of wire and radio communication as required by the Communications Act of 1934, as amended. DIRS is a voluntary, efficient, and web-based system that communications companies may use to report their infrastructure status during times of crisis (e.g., related to a disaster). DIRS uses a number of template forms tailored to different communications sectors (i.e., wireless, wireline, broadcast, and cable) to facilitate the entry of this information. To use DIRS, a company first inputs its emergency contact information. After this, they submit information using the template form appropriate for their communications sector. In a *Second Report and Order* adopted on March 18, 2021, as FCC 21–34, the Commission adopted rules allowing certain federal, state, and Tribal Nation agencies (Participating Agencies) to access to certain geographically relevant reports filed in the Commission's Disaster Information Reporting System (DIRS). The information collections and record keeping provisions adopted will allow Participating Agencies to apply for, and receive access to, DIRS report in the areas where they have jurisdiction. The collection will further enable these Participating Agencies, at their election, to share DIRS reports with qualified local agencies whose jurisdiction is affected by a disaster, while still maintaining the confidentiality of the substantive data. The changes to the data collections fields in the DIRS filings made by service providers will

further facilitate the ability of Participating Agencies to access those reports relevant to their specific geographies. Finally, the changes to the information collection and associated recordkeeping requirements, including retention by participating agencies of qualification forms submitted by local agency seeking access to DIRS data, as well as a list of which local agencies receive information from the Participating Agency, training materials setting clear parameters for the use of DIRS data, and a list of those persons granted DIRS account access, will enable auditing functions to ensure accountability in the use of DIRS information and immediate reporting of breaches of access or confidentiality protocols.

The Commission notes that the information sharing framework established in the Second Report and Order allows for access to be granted not only for DIRS, but also to the Commission's Network Outage Reporting System (NORS). We note that the process and requirements for Participating Agencies under this framework is identical, regardless of whether they seek access to NORS, DIRS, or both. Because the Commission anticipates that NORS and DIRS access will be requested together in most cases, it believes that the estimated burden hours and costs for Participating Agencies associated with DIRS access are fully included in the estimates that it has separately submitted as part of its collection on Part 4 of the Commission's Rules Concerning Disruptions to Communications, OMB Control No. 3060–0484. To avoid double-counting the estimated burden hours and costs associated with both collections, the Commission estimates the marginal cost of the Participating Agency aspect of this collection to be zero.
