SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing

The objective of the study is to examine the behavior of humpback whale mother/calf pairs on their summer feeding grounds and compare the maternal behavior of solitary and social foragers. The study will also attempt to identify differences in the early behavior of the mother/calf pairs that may lead to the adoption of a particular foraging strategy in juveniles. A total of 250 humpbacks from all age classes will be approached annually for photo-identification, hydrophone recordings and video taping of behavior. Research activities will be conducted in southeastern Alaska through October 15, 2006.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.
