

quality, and efficiency of new procedures or revisions to the existing survey protocol. These field tests will examine ways to increase data quality, lower operating costs, and gain a better understanding of various sources of nonsampling error. If these tests provide successful results, current procedures may be revised and incorporated into the main study (e.g., questionnaire changes). Particular attention will be given to minimizing the impact of design changes so that survey data continue to remain comparable over time.

Field test activities are expected to include validating new questions on

depression; examining data reliability through the use of test-retest procedures; improving response rates among persons residing in controlled access communities (locked apartment buildings, gated communities, college dormitories, etc.), persons aged 50 or over, and other hard-to-reach populations; and conducting a nonresponse follow-up study. Cognitive laboratory testing will be conducted prior to the implementation of significant questionnaire modifications. These questionnaire modifications will also be pre-tested and the feasibility of text-to-speech software determined. To

understand the effectiveness of the current monetary incentive, a new incentive study will be conducted with varying incentive amounts. The relationship between incentives and veracity of reporting will also be examined. Lastly, there will be a test to determine the feasibility of selecting a maximum of three persons per dwelling unit instead of two (triad sampling). Some of the above studies may be combined to introduce survey efficiencies.

The average annual burden associated with these activities over a three-year period is summarized below:

Activity	Number of respondents	Responses per respondent	Average burden per response (hrs.)	Total burden (hrs.)
a. Reliability/depression module validity study	2,001	2	1.5	6,003
b. Focus groups with 50+ populations	132	1	2.0	264
c. Improving participation among controlled access and 50+ population, and other hard-to-reach populations	1,251	1	1.0	1,251
d. Nonresponse follow-up	1,251	1	1.0	1,251
e. Incentive/validity study	1,251	1	1.0	1,251
f. Cognitive laboratory testing	501	1	1.0	501
g. Annual questionnaire pre-test	999	1	1.0	999
h. Text-to-speech software for voices in computer-assisted interviewing	249	1	1.0	249
i. Triad sampling	999	1	1.0	999
Household screening for a–d, f, h, and i	21,313	1	0.083	1,769
Screening Verification for a, c, d, e, g, and i	638	1	0.067	43
Interview Verification for a, c, d, e, g, and i	1,163	1	0.067	78
Total	22,063			14,658

Estimate Burden for Groups with 50+ Population (also included in above burden table):

Activity	Number of respondents	Responses per respondent	Average burden per response (hrs.)	Total burden (hrs.)
Focus groups with 50+ populations	132	1	2.0	264
Household screening for a, b, c, d, e, g, and i	383	1	0.083	32
Total	383			296
Annual average (Total divided by 3 years)	128			99

Substance Abuse and Mental Health Services Administration

Center for Substance Abuse Prevention; Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Substance Abuse and Mental Health Services Administration (SAMHSA) Drug Testing Advisory Board to be held in June 2004.

On June 8, the Board will meet in open session from 8:30 a.m. to 11:30 a.m. The open session will include a Department of Health and Human Services drug testing program update, a presentation on the revisions to the "Mandatory Guidelines for Federal Workplace Drug Testing" published in the **Federal Register** on April 13, 2004 (69 FR 19644-19673), and a Department of Transportation drug testing program update. If anyone needs special accommodations for persons with disabilities, please notify the Contact listed below.

The Board will meet in closed session on June 8, from 11:30 a.m. to 4:30 p.m. to review and evaluate proprietary testing processes and procedures of drug testing laboratories certified to perform drug testing in accordance with the "Mandatory Guidelines for Federal Workplace Drug Testing Programs" (Mandatory Guidelines) published in the **Federal Register** (59 FR 29908-29931 on June 9, 1994, 63 FR 51118-51119 on September 30, 1997, and 63 FR 63483 on November 13, 1998). Public disclosure of information concerning proprietary laboratory testing processes would result in competitive harm to the laboratories and significantly impede the cooperation of laboratories in fully disclosing information to inspectors during laboratory inspections. The meeting must be conducted in closed session because disclosure of such proprietary laboratory information would significantly impede the Department's ability to certify laboratories to meet the standards of Subpart C of the Mandatory Guidelines and is therefore protected by exemption 9(B) of section 552b of title 5 U.S.C.

The Board will meet in closed session on June 9, from 8:30 a.m. until noon to review and discuss new specimen adulteration methods by which persons subject to drug testing may subterfuge the drug test and the Department's ability to detect them. This meeting must be conducted in closed session since disclosing information on such specimen adulteration methods will significantly frustrate the Department's ability to assure accurate and reliable drug and specimen validity testing, and is therefore protected by exemption 9(B) of section 552b(c) of title 5 U.S.C.

A roster of the board members may be obtained from: Mrs. Giselle Hersh, Division of Workplace Programs, 5600 Fishers Lane, Rockwall II, Suite 815, Rockville, MD 20857, 301-443-6014 (voice).
