[Docket No. DHS–2010–0073]

**Science and Technology (S&T) Directorate; Agency Information Collection Activities: Submission for Review; Information Collection Request for the Department of Homeland Security (DHS) Science and Technology Protected Repository for the Defense of Infrastructure Against Cyber Threats (PREDICT) Program**

**AGENCY:** Science and Technology Directorate, DHS.

**ACTION:** 30-day notice and request for comment.

**SUMMARY:** The Department of Homeland Security invites the general public to comment on data collection forms for the Protected Repository for the Defense of Infrastructure Against Cyber Threats (PREDICT) initiative. PREDICT is an initiative to facilitate the accessibility of computer and network operational data for use in cybersecurity defensive research and development. Specifically, PREDICT provides developers and evaluators with regularly updated network operations data sources relevant to cybersecurity defense technology development. The data sets are intended to provide developers with timely and detailed insight into cyberattack phenomena occurring across the Internet and in some cases will reveal the effects of these attacks on networks that are owned or managed by the data producers. A key motivation of PREDICT is to make these data sources more widely available to technology developers and evaluators, who today often determine the efficacy of their technical solutions on anecdotal evidence or small-scale test experiments, rather than on more comprehensive real-world data. The PREDICT Web site <http://www.predict.org> contains an overview and general information as background, along with the data repository. As specified on the Web site, access to the PREDICT data repository is available to eligible research groups upon approval of their applications. In addition to helping to determine whether a group is eligible to access the repository, the forms will also manage the interactions between the PREDICT portal administrators and the research groups accessing the PREDICT portal. The Department is committed to improving its PREDICT initiative and invites interested persons to comment on the following forms and instructions (hereinafter "Forms Package") for the PREDICT initiative: (1) Account Request
