ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2011-0837; FRL-9504-6]

Notice of Receipt of, and Opportunity To Comment on, a Plan by Fiberight of Blairstown LLC for Separation of Recyclable Material From Municipal Solid Waste Intended for Use as a Feedstock for Renewable Fuel Production at a Blairstown, IA Biorefinery

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is issuing notice of receipt of, and opportunity to comment on, a plan by Fiberight of Blairstown LLC to remove recyclables from municipal solid waste (MSW) prior to its use as a feedstock for renewable fuel production at their biorefinery in Blairstown, Iowa. Submission of a separation plan is a registration requirement under the Renewable Fuel Standard Program regulations established under Clean Air Act section 211(o) for producers seeking to make qualifying renewable fuel from MSW-derived feedstock. The separation plan

must demonstrate ongoing verification that there is separation of recyclable paper, cardboard, plastics, rubber, textiles, metals, and glass wastes to the extent reasonably practicable. MSW-derived feedstock collected according to a separation plan approved by EPA may qualify as “separated MSW” in biofuel production pathways authorized for generation of Renewable Identification Numbers (RINs) under the Renewable Fuel Standard Program.

DATES: Comments must be received on or before January 9, 2012.

SUPPLEMENTARY INFORMATION:

(A) Request for Comments

On October 11, 2011, Fiberight Blairstown Operating, LLC (“Fiberight”) submitted a plan to EPA pursuant to 40 CFR 80.1450(b)(1)(viii) for the separation of recyclable material from municipal solid waste (MSW) prior to its use as a feedstock for renewable fuel production under the Renewable Fuels Standard Program of Clean Air Act Section 211(o). The Fiberight separation plan has been placed in the public docket and is available for public comment.

Fiberight seeks EPA approval that their plan will demonstrate ongoing verification that there is separation from MSW of recyclable paper, cardboard, plastics, rubber, textiles, metals, and glass wastes to the extent reasonably

practicable before the separated MSW is used as a feedstock for biofuel production. EPA has outlined registration requirements for producers of renewable fuel made from separated MSW in 80.1450(b)(1)(viii), including the requirement for submission of a separation plan. EPA has also developed supplemental questions to better understand where the recyclable materials will be diverted after separation, the recycle goals of the local community, and the existing recycling programs and infrastructure in the region. Fiberight provided responses to these supplemental questions in their plan (referenced in pages 13 to 16 of their plan). EPA solicits comments and information to assist EPA in evaluating the Fiberight separation plan for possible approval.

Although EPA's approval or disapproval of the Fiberight separation plan will not be conducted through rulemaking, and an opportunity for public comment is not legally required prior to EPA action on the plan, EPA is soliciting public comment at this time because the Fiberight separation plan is the first such plan to be submitted to EPA for approval. EPA believes that public comment on this first plan submission would be beneficial, but EPA may not seek public comment prior to approval or disapproval of future separation plan submissions.

The public is specifically invited to comment whether Fiberight's separation plan incorporates all of the elements required in the regulations and provides for the separation of recyclable cardboard, plastics, rubber, textiles, metals, and glass from MSW to the extent that is reasonably practicable.

Dated: December 5, 2011.

Margo Tsirigotis Oge,

Director, Office of Transportation and Air Quality.
