SUPPLEMENTARY INFORMATION: The information collected under the requirements of FERC-715 "Annual Transmission Planning and Evaluation Report" (OMB Control No. 1902-0171) is used by the Commission to implement the statutory provisions of Sections 202, 207, 210, 211-213 of the Federal Power Act (FPA), as amended (49 Stat. 838; 16 U.S.C. 791a-825r) and particularly Sections 213(b), 304, 309 and 311. The Commission describes the Form 715 filing requirements in the Code of Federal Regulations (CFR) under 18 CFR part 141.300.

FERC Form No. 715 gathers basic electric transmission systems information. The Commission staff uses the Form 715 information to evaluate available transmission capacity and transmission constraints on electric transmission systems. Electrical transmission customers use the information to determine transmission availability.

Transmission dependent utilities use the information to determine transmission availability from alternative wholesale suppliers.

Federal, military, and private agencies use the information to simulate various scenarios and test theories in order to improve the current transmission system. Form 715 may be accessed on the Commission's Web site at <http://www.ferc.gov/docs-filing/eforms-elec.asp>.

Action: The Commission is requesting a three-year extension of the current expiration date, with no changes to the existing collection of data.

Burden Statement: Public reporting burden for this collection is estimated as:

Number of respondents annually	Number of responses per respondent	Average burden hours per response	Total annual burden hours
(1)	(2)	(3)	(1)×(2)×(3)
183	1	160	29,280

Estimated cost burden to respondents: 29,280 hours / 2,080 hours per year × \$117,041 per year = \$1,647,577. The cost per respondent is equal to \$ 9,003.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology *e.g.*, permitting electronic submission of responses.

Secretary.

ANR Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

September 11, 2003.

Take notice that on August 29, 2003, ANR Pipeline Company (ANR) tendered for filing, as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets proposed to become effective September 1, 2003:

Fifty-Seventh Revised Sheet No. 8
Fifty-Seventh Revised Sheet No. 9
Fifty-Sixth Revised Sheet No. 13
Sixty-Ninth Revised Sheet No. 18

ANR states that the above-referenced tariff sheets are being filed to implement recovery of approximately \$12.2 million of above-market costs that are associated with its obligation to Dakota Gasification Company (Dakota) and the Dakota buyout costs resulting from the assignment of the Gas Purchase Agreement with Dakota as well as related transportation capacity to BP Canada Energy Marketing Corp. ANR states that they propose a reservation surcharge applicable to its part 284 firm transportation customers to collect ninety percent of the Dakota costs, and an adjustment to the maximum base tariff rates of Rate Schedule ITS and overrun rates applicable to Rate Schedule FTS-2, so as to recover the remaining ten percent.

ANR states that the proposed changes would increase the current Above-Market Dakota Cost recoveries from \$2,228,076 recovered over three months to \$12,201,492 recovered over twelve months.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations.
