Affected entities: Entities potentially affected by this action are state and local governments, state and county colleges, and those organizations which provide training assistance through the Clean Water Act 104(g)(1) Program to municipal wastewater treatment plants.

Title: National Wastewater Operator Training and Technical Assistance Program. (OMB Control No. 2040-0238. EPA ICR No.: 1977.02, expiring 09/30/2004.

Abstract: The Wastewater Operator Training Program provides on-site technical assistance to municipal wastewater treatment plants. Information will be collected from the network of forty-six 104(g)(1) training centers set up throughout the United States. The information will be collected to identify the facilities assisted, the different types of assistance the program provides and the environmental

outcomes and benefits of the assistance provided by the program. The information will be collected and submitted on either an annual or semi-annual basis. A Microsoft Access database and a Lotus 1-2-3 spreadsheet have been developed for this purpose. This ICR will be used by EPA for the technical and financial management of the 104(g)(1) Program. It is strongly suggested that the 104(g)(1) Program training centers participate in the information collection although it is not mandatory. All information in the data system will be made public upon request. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers are listed in the Code of Federal Regulations title 40, part 9 and in the Code of Federal Regulations title 48, chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The projected combined annual burden hours of this ICR to all respondents will be approximately 512 hours. The average annual burden hours to each 104(g)(1) training center grantee will be 7 hours, for a total of 322 hours per year, at an annual cost of \$9717.96 (assuming an average hourly salary of \$30.18). The average annual burden hours to the EPA's Regional Offices and Headquarters will be 16 hours each, for a total of 176 burden hours per year, at an annual cost of \$6899.20 (assuming an average hourly salary of \$39.20).

Data will be collected on an annual basis, in May of each year, for the Microsoft Access database collection, and data for the Lotus 1-2-3 spreadsheet information collection will be done on a bi-annual basis, in May

and November of each year. Although this information collection is not mandatory, it is expected that 100% of the 104(g) training centers will respond to this collection request. All forty-six (46) training centers and EPA have the necessary equipment, desk-top computers and software to collect and manage this information. There will be no additional start-up or maintenance costs associated with this project to perform this information collection request. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: October 24, 2003.

Jane S. Moore,

Acting Director, Office of Wastewater Management.
