SUPPLEMENTARY INFORMATION

I. Background

On September 28, 2017, the Board approved the following actions:¹

- Closing the Temporary Corporate Credit Union Stabilization Fund (Stabilization Fund) and distributing its funds, property, and other assets and liabilities to the Insurance Fund, effective October 1, 2017.
- Setting the Normal Operating Level of the Insurance Fund to 1.39 percent, effective September 28, 2017.
- Adopting the policy for setting the Normal Operating Level, as outlined below.

Policy for Setting the Normal Operating Level

The policy for setting the Normal Operating Level adopted in 2017 established a periodic review of the equity needs of the Insurance Fund, the results of which are to be communicated to stakeholders.² At least annually, NCUA staff will review the level at which the NOL is set and report this information to the Board. Board action is only necessary when a change in the NOL is determined to be warranted. The policy establishes that any change to the Normal Operating Level of more than one basis point³ shall be made only after a public announcement of the proposed adjustment and opportunity for comment. Further, in soliciting comment, the NCUA will issue a public report, including data supporting the proposal. The policy establishes the following objectives that the Board will seek to satisfy when setting the Normal Operating Level:

- Retain public confidence in federal share insurance;
- Prevent impairment of the one percent contributed capital deposit;⁴ and
- Ensure the Insurance Fund can withstand a moderate recession without

¹ 82 FR 42298 (Oct. 4, 2017).

² As noted, the Board adopted this policy for setting the Normal Operating Level in 2017. The Board emphasizes that, as a general statement of the NCUA’s policy regarding setting the Normal Operating Level, the Board is not required to follow the notice-and-comment rulemaking process when revising this policy. See 5 U.S.C. 553(b)(3)(a). Nevertheless, the Board is voluntarily soliciting public input on this policy.

³ One basis point is one hundredth of one percent.

the equity ratio declining below 1.20 percent over a five-year period.

The current economic landscape and pending resolution of the obligations associated with the corporate credit union asset management estates and NCUA Guaranteed Notes (NGN) Program discussed later in this document warrant that the NCUA re-evaluate the current Normal Operating Level policy.

II. Legal Authority

Per the Federal Credit Union Act (Act), the Normal Operating Level is an equity ratio set by the Board and may not be less than 1.20 percent and not more than 1.50 percent.⁵ The Board has historically set the Normal Operating Level as the target equity ratio for the Insurance Fund.

The Insurance Fund’s calendar year-end equity ratio is part of the statutory basis to determine whether the NCUA must make a distribution to insured credit unions.⁶ The Act states the Board shall effect a pro rata distribution to insured credit unions after each calendar year if, as of the end of that calendar year—

- Any loans to the Fund from the Federal Government, and any interest on those loans, have been repaid;
- The Fund’s equity ratio exceeds the Normal Operating Level; and
- The Fund’s available assets ratio exceeds 1.0 percent.⁷

The provisions of the Act are implemented at 12 CFR part 741 of the NCUA’s regulations.

III. Current Normal Operating Level Methodology and Process

To implement the current approved policy, the NCUA developed a calculation based on projections related to the following factors:

- The modeled performance of the Insurance Fund over a five-year period, assuming a moderate recession. The stress scenario entails estimating three primary drivers of outcomes: insurance losses, insured share growth, and yield on investments. The NCUA’s analysis is based on the Federal Reserve’s adverse economic scenario; however, the Federal Reserve did not publish an adverse scenario in 2020 or 2021. This necessitates the NCUA develop an adverse scenario based on the Federal Reserve’s published baseline and severely adverse scenarios.

⁵ 12 U.S.C. 1782(h)(4).

⁶ The equity ratio is also part of the statutory basis for determining whether a premium or Insurance Fund restoration plan is necessary.

⁷ 12 U.S.C. 1782(c)(3). This section is also subject to 12 U.S.C. 1790e(e).
