## DEPARTMENT OF COMMERCE

### Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the

Paperwork Reduction Act (44 U.S.C. chapter 35).

*Agency:* U.S. Census Bureau.

*Title:* 2013 National Census Contact Test.

*OMB Control Number:* None.

*Form Number(s):* None

*Type of Request:* New collection.

*Burden Hours:* 4,667.

*Number of Respondents:* 40,000.

*Average Hours per Response:* 7 minutes.

*Needs and Uses:* The U.S. Census Bureau is committed to using alternative approaches for contacting potential respondents, such as cell phones, landlines, text messages and emails in an effort to reduce costs by increasing self-response. However, developing and implementing successful and secure contact and response strategies during the 2020 Census requires research throughout the next decade. The Census Bureau must conduct a series of research projects and tests to fulfill its commitment to provide the public with an option to complete their 2020 Decennial Census questionnaire using these alternate contact strategies through a self-response test.

The 2013 National Census Contact Test (NCCT), formerly named the 2013 Alternative Contact Strategy Test, supports this alternate contact research. The 2013 NCCT will be conducted over the telephone, using a Computer Assisted Telephone Instrument (CATI) with approximately 40,000 households between January 7, 2013, and February 1, 2013. These interviews will enable Census staff to assess the quality of the data from vendor files that are under consideration for use in the construction of an Alternate Contact Frame. The 2013 NCCT questionnaire will ask respondents for basic demographic information collected in a Census. Demographic information includes questions such as household roster, age, race, Hispanic origin, relationship, and sex. The questionnaire also takes the approach of requesting email addresses and telephone numbers from the respondents. Afterward, the respondent-provided address, phone numbers, and email addresses will be matched to the vendor data being evaluated as well as to the Master Address File (MAF). In addition, the NCCT provides an opportunity for the Census Bureau to test potential enhancements to its automated processing of responses
