

that makes it easy for schools and libraries, and in particular small applicants without dedicated staff for a hotspot lending program, to identify the devices that are going unused. In the *FNPRM*, the Commission considers alternatives by asking if for the E-Rate program, it should consider the requirement of alternative billing methods, such as usage-based pricing models. The *FNPRM* also requests comments on whether service providers should be required to offer a simple way to remotely discontinue and reestablish lines when requested by applicants and if there are different levels of service needed depending on the school or library size.

Further, the *FNPRM* seeks comments on potential costs and benefits of the proposed rule changes. The Commission expects the information received in the comments in response to the *FNPRM* will allow it to more fully consider ways to minimize the economic impact on small entities and explore additional alternatives to improve and simplify opportunities for small entities to participate in the E-Rate program, while also ensuring usage in the E-Rate funded school and library hotspot lending programs.
