

document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

The FAA is amending 14 CFR part 71 by establishing Class E airspace extending upward from 700 feet above the surface at Hughes Airport, Hughes AK.

The Class E airspace will be established within a 3.8-mile radius of the airport and within an area 2 miles each side of the 194° bearing extending from the airport 6.4 miles south. This area will protect aircraft on approach to runway 36 as they descend through 1,500 feet above ground level (AGL). In addition, an extension in the shape of a dogleg will be established 1.8 miles each side of the 14° bearing extending from the 3.8-mile radius to 6 miles north of the airport and then 1.8 miles each side of the 39° bearing from a point in space, lat. 66°08'14" N, long. 154°12'17" W, forming an angle that extends from the 3.8-mile radius northeast 9.5 miles from the airport. This section will protect aircraft on approach to runway 18 descending through 1,500 feet AGL and those aircraft on departure until reaching 1,200 feet AGL.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under Executive Order (E.O.) 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental

Impacts: Policies and Procedures," paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.
