SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Optimized Fleet Response Plan Phase Variation in Signature and Destructive Behaviors; OMB Control Number 0703-OFRP.

Needs and Uses: Congruent with research findings, the Chief of Naval Operations has directed the Navy to create a "Culture of Excellence," noting that by focusing on positive, signature behaviors, the Navy can build and sustain a lethal force of tough sailors who are ethical and masters of their trade. The Navy has identified ten signature behaviors to drive a culture of excellence: Treat every person with respect, take responsibility, hold others accountable, intervene, when necessary, be a leader and encourage leadership, embrace diversity, uphold integrity, exercise discipline, and contribute to team success.

The Culture of Excellence Campaign's Perform to Plan effort will empower warfighting capability by fostering psychological, physical, and emotional toughness. To meet this goal, the Navy needs to understand what encourages signature behaviors and reduces destructive behaviors and how these behaviors impact readiness. The

overarching aim of this study is to support this effort. The study will answer three questions: (1) What are the rates of signature and destructive behaviors during three phases of Optimized Fleet Response Plan (OFRP)? (2) Do rates differ by organizational command (department)? (3) How do signature and destructive behaviors impact readiness?

Researchers will utilize a mixed-methods, explanatory sequential design where the first phase will be quantitative (survey) followed by a qualitative phase (interviews) to elaborate on the quantitative findings. The team will ascertain the rates of signature and destructive behaviors and differences across selected command types by collecting self-report survey data on the prevalence of selected signature and destructive behaviors from sailors in different phases of the OFRP and in selected different command types. The team will compare the data across phases and selected commands to assess differences and identify patterns. The team will investigate how selected signature and destructive behaviors affect readiness through quantitative and qualitative data collection and analysis.
