BILLING CODE 4210-27-P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Central Utah Project Completion Act

AGENCY: Office of the Assistant
Secretary for Water and Science,
Department of the Interior.

ACTION: Notice of intent to negotiate a
contract between the Central Utah Water
Conservancy District and Department of
the Interior for prepayment of costs
allocated to municipal and industrial
water from the Bonneville Unit of the
Central Utah Project, Utah County,
Utah.

SUMMARY: Public Law 102-575, Central
Utah Project Completion Act, Section
210, as amended through Public Law
104-286 and Public Law 107-366,
stipulates that: AThe Secretary shall
allow for prepayment of the repayment
contract between the United States and
the Central Utah Water Conservancy
District dated December 28, 1965, and
supplemented on November 26, 1985, or
any additional or supplemental
repayment contract providing for
repayment of municipal and industrial
water delivery facilities of the Central
Utah Project for which repayment is
provided pursuant to such contract,
under terms and conditions similar to
those contained in the supplemental

contract that provided for the prepayment of the Jordan Aqueduct dated October 28, 1993. The prepayment may be provided in several installments to reflect substantial completion of the delivery facilities being prepaid and may not be adjusted on the basis of the type of prepayment financing utilized by the District. Nothing in this section authorizes or terminates the authority to use tax exempt bond financing for this prepayment. In accordance with the above referenced legislation, the Central Utah Water Conservancy District (CUWCD) intends to prepay the costs obligated under repayment contract No. 14-06-400-4286, as supplemented. This contract will provide for the fifth installment in a series of prepayments. The terms of the prepayment are to be publicly negotiated between CUWCD and the Department of the Interior.

DATES: Dates for public negotiation sessions will be announced in local newspapers.

FOR FURTHER INFORMATION CONTACT:

Additional information on matters related to this Federal Register notice can be obtained by contacting Mr. Wayne Pullan, Program Coordinator, CUP Completion Act Office, Department of the Interior, 302 East 1860 South, Provo UT 84606-6154, (801) 379-1194, wpullan@uc.usbr.gov.

Dated: September 29, 2004.

BILLING CODE 4310-RK-P

DEPARTMENT OF THE INTERIOR

Central Utah Project Completion Act

AGENCIES: Department of the Interior, Office of the Assistant Secretary—Water and Science, (Interior); Utah Reclamation Mitigation and Conservation Commission, (Mitigation Commission); Central Utah Water Conservancy District, (CUWCD).

ACTION: Notice of availability of the Utah Lake Drainage Basin Water Delivery System, Final Environmental Impact Statement for the facilities and measures authorized in Sections 202(a)(1), 202(c), 207, and 302 of the Central Utah Project Completion Act (CUPCA), which is part of the Bonneville Unit of the Central Utah Project.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, Interior, CUWCD, and the Mitigation Commission (Joint-Lead Agencies), have

issued a Final Environmental Impact Statement (FEIS) for the Utah Lake Drainage Basin Water Delivery System (Utah Lake System), Bonneville Unit, Central Utah Project. The FEIS addresses potential impacts related to construction and operation of the features proposed for the Utah Lake System. The FEIS is intended to satisfy disclosure requirements of the National Environmental Policy Act (NEPA) and will serve as the NEPA compliance document for contracts, agreements and permits that would be required for construction and operation of the Utah Lake System. The Joint-Lead Agencies intend to seek Clean Water Act compliance through Section 404(r) provisions by including a 404(b)(1) analysis within the FEIS and therefore an exemption from the requirements to obtain a Section 404 permit for construction. In addition to this notification, notices will be published in local newspapers.

FOR FURTHER INFORMATION CONTACT:

Additional information on matters related to this notice can be obtained from Mr. Reed Murray at (801) 379-1237, or rmurray@uc.usbr.gov.

Additional copies of the FEIS, and copies of the resource technical reports can be obtained from Ms. Laurie Barnett, Central Utah Water Conservancy District, 355 West University Parkway, Orem, Utah, 84058.

Copies are also available for inspection at:

SUPPLEMENTARY INFORMATION:

Background—The Utah Lake System is one of the systems of the Bonneville Unit of the Central Utah Project that would develop central Utah's water resources for municipal and industrial supply, fish and wildlife, and recreation. Initiation of planning for the Utah Lake System was announced in the **Federal Register** on October 14, 1998 (FR Doc. 98-27484). Notice of intent to initiate scoping and prepare a Draft

Environmental Impact Statement (DEIS) was announced in the **Federal Register** on August 23, 2000 (FR Doc. 00-21458). Scoping was accomplished in two stages: informal scoping was conducted through public meetings in September 2000 and October 2001; and formal scoping was conducted through mailings and public meetings during February 2002. The DEIS was issued by the Joint-Lead Agencies on March 25, 2004. Notice of availability of the DEIS was published in the **Federal Register** on March 30, 2004, (FR Doc. 04-7034). Comments received during the public comment period from March 25, 2004, until June 11, 2004, were considered during preparation of the FEIS. Public hearings were held April 28 and 29, 2004, for the purpose of receiving comments on the DEIS. Publication of the Record of Decision will occur no sooner than 30 days from the date of this notice.

Proposed Action Alternative—The Utah Lake System Proposed Action Alternative would provide an average transbasin diversion of 101,900 acre-feet which consists of 30,000 acre-feet of Municipal and Industrial (M&I) secondary water to southern Utah County and 30,000 acre-feet of M&I water to Salt Lake County water treatment plants; and 40,310 acre-feet of M&I water to Utah Lake for exchange to Jordanelle Reservoir. It would conserve water in a Mapleton-Springville Lateral Pipeline, conserve water in the Provo River basin and deliver it along with acquired water to assist June sucker spawning and rearing in the lower Provo River, convey water to support year-round instream flows in Provo River and seasonal instream flows in Hobbie Creek to assist in the recovery of the June sucker, and develop hydropower. This alternative would involve construction of five new pipelines for delivery of water and 2 new hydropower plants and associated transmission lines. Under this alternative, Interior would acquire 57,000 acre-feet of the District's secondary water rights in Utah Lake to provide a firm annual yield of 60,000 acre-feet of ULS M&I water.

Bonneville Unit Water Alternative—The Bonneville Unit Water Alternative would have an average transbasin diversion of 101,900 acre-feet consisting of: 15,800 acre-feet of M&I water to southern Utah County to be used in secondary water systems; and 84,510 acre-feet of M&I water delivered to Utah Lake for exchange to Jordanelle Reservoir. It would conserve water in a Mapleton-Springville Lateral Pipeline, conserve water in the Provo River basin and deliver it along with acquired water
