

4. *Establishing methodology for offsetting cost of producing self-employment income*—7 CFR 273.10. In accordance with Section 5(d)(9) of the Act, 7 U.S.C. 2014(d)(9), the gross amount of self-employment income is reduced by the cost of producing such income. Section 5(m) of the Act, 7 U.S.C. 2014(m), as amended by section 812 of PRWORA, allows State agencies to use a reasonable estimate of self-employment costs rather than actual costs to compute net income from self-employment provided the method will not increase program costs. Requests to use such estimates must be submitted to FNS and must include a description of the proposed method; the number, type and percent of households affected; and documentation indicating that the procedure would not increase Program costs. We estimate that 10 State agencies will submit requests of this type each year for the next three years. It is estimated that these States will incur a one-time burden of at least 10 working hours gathering and analyzing data, developing the methodology, determining the cost implication, and submitting a request to FNS for a total burden of 100 hours annually. State agencies are not required to periodically review their approved methodologies. We do not anticipate that State agencies will voluntarily review their methodologies for change on a regular basis, thus burden is not being assessed for this purpose at this time.

*Affected Public:* State and local governments.

*Estimated Number of Respondents:* 53.

*Estimated Number of Responses:* 93.

*Estimated Annual Burden on Respondents:* 250.
