FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission, Comments Requested

August 18, 2004

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Pub. L. 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before October 25, 2004. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all Paperwork Reduction Act (PRA) comments to Les Smith, Federal Communications Commission, Room 1-A804, 445 12th Street, SW., Washington, DC 20554 or via the Internet to Leslie.Smith@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Les Smith at (202) 418-0217 or via the Internet at Leslie.Smith@fcc.gov.

Reproductive Health Research

Announcement Type: New.

Funding Opportunity Number: RFA DP05-010.

Catalog of Federal Domestic Assistance Number: 93.946.

Key Dates:

Letter of Intent Deadline: September 23, 2004.

Application Deadline: November 8, 2004.

Executive Summary: The Division of Reproductive Health has four priority areas addressed by this announcement: (1) Maternal health, (2) infant health, (3) unintended and teen pregnancy prevention, and (4) women's reproductive health. This announcement seeks proposals for etiologic or interventional research that one or more of these four priority areas, especially as they relate to the problems of disparities in risk, prediction of risk, and prevention of preterm birth or unintended pregnancy. This program addresses the "Healthy People 2010" focus areas of Maternal, Infant, and Child Health and Family Planning.

I. Funding Opportunity Description

Authority: This program is authorized under Sections 301 (a) and 317 (k)(2) [42 U.S.C. 241 (a) and 247b (k)(2)] of the Public Health Service Act, as amended.

Purpose: The purpose of the program is to generate new knowledge to further the health of United States families and to eliminate disparities related to contraception, pregnancy, preterm delivery, and human reproduction.

Measurable outcomes of the program will be in alignment with one or more of the following performance goals (1) reduce maternal morbidity and mortality; or (2) identify biological and behavioral risk factors influencing prematurity; (3) increase the proportion of pregnancies that are intended; (4) reduce pregnancies among adolescent females; or (5) increase the proportion of adolescents who abstain from sexual intercourse or use condoms if currently sexually active.

Research Objectives:

(1) To gain a better understanding of the susceptibility to preterm delivery, in a public health framework, through research that explores:

- The social, behavioral, community, genetic, historical, and biologic determinants of preterm birth.
- The effect of gene variation within and between groups on the risk of preterm birth, and how the environment modifies that risk.
- The potential to predict the risk of preterm birth using combinations of social, behavioral, community, genetic, historical, and biologic determinants of preterm birth.

- To gain a better understanding of the clinical use of 17-alpha hydroxyprogesterone for the prevention of preterm delivery, evaluate barriers to its use, and develop capacity for future expanded studies of therapeutic effectiveness in the context of routine obstetrical care.

(2) To prevent unintended and teen pregnancy and to improve reproductive health among U.S. teens through innovative intervention research, non-intervention research, and research with Latino youth. Latinos are now the number one minority adolescent population and will continue to grow given the population demographics of such a young U.S. Latino population. Much of the data for Latinos are not disaggregated by ethnic subgroups or by first or subsequent generation and, therefore, preclude a discussion of differing risk factors and sexual health outcomes specific to each subgroup. Latinos have the highest teen pregnancy rate and over half of teenaged Latinos are sexually active. They are among the
